8 研究成果の概要(1,800字以内)

昭和63年度は

- 1) ハワイ調査実施(63年度海外学術調査として実施)
1972年、1978年及び1983年の調査実施により連鎖的調査方法の基礎が開発され、その有効性が確かめられてきた。1983年は継続調査項目による連鎖的調査方法の安定性の確認及び共通項目を利用した効果的な通用(質問項目の組合せ)方法を考え、調査項目を選定し調査を実施した。調査完了は509、集計サンプルは499である。(1983年ホノルルで実施)
- 2) アメリカ本土全国調査実施(実施は特別推進研究による)
これまでの調査経験があり、連鎖的調査方法を効果的に適用できるとともに、この連鎖的調査方法の安定性及び拡大をはかるため、アメリカ本土における調査を実施した。調査項目は日本調査及びヨーロッパ調査と共通。調査回収サンプル数は1563。これは前回1978年アメリカ調査と同じ規模である。

平成元年度は

昭和62年度・63年度に実施した調査の調査結果を整理し、集計分析用共通ファイルを作成した。これに基づき、関連調査との比較を行なうとともに、各国共同研究者との結果分析・検討を行なった。具体的には、

- 1) 62年度実施のヨーロッパ調査(仏、独、英)および63年度実施の日本調査、アメリカ本土調査、ハワイホノルル調査(63年度海外調査で実施)の各調査を個別に整理し、データ・クリーニングをおこない、コード・ブックを作成した。
- 2) 各個別調査の各質問項目および回答者属性項目の回答肢を標準化し、共通ファイルを作成し、コード・ブックを作成した。
- 3) 各個別調査ごとに関連調査との比較分析を行ない、各国における調査結果の経年的動向に関する基礎資料を得た。さらに、日本調査、ハワイホノルル調査、アメリカ本土調査については連鎖的比較調査方法の安定性を検討した。

連続的調査方法の方法論を確立するため、調査の結果分析を、当研究グループ及び各国共同研究者が独自に行ない、それを単に比較するだけでなく、独自の分析結果をもちより、パリ（国立高等電通大学院）、ケルン（Z A）、マンハイム（ZUMA、調査分析センター）、ブリュッセル（E C委員会）、ウィーン（ヨーロッパ社会科学センター）等で、共同討議を重ねた。これにより、同異の本質的な部分を客観的にとらえることの可能性が確かなものとなった。また、アメリカでは、スタンフォード（フーパー研究所）で、日本とアメリカの国民性に関する研究会を行ない、社会調査データにもとづく国民性研究の基本的鼎問題および調査データによる国際比較研究の鼎問題を討議した。これにより、国際比較研究における連続的調査方法の具体化にとって有効な方策、および調査データによる比較分析方法の改善の方策について知見を得た。

調査結果を要約してみると、以下の通りである。

日本、アメリカ、両者の調査データは1978年調査、1988年調査とも安定しており、この10年間の変化はごく少ない。一方1988年ハワイ調査の結果は、1972年よりの継続調査（4回目）として分析検討した。前回1983年調査と比較したとき、環境等2、3の項目に時代の影響がみられるほか、変化はほとんどなく回答結果は安定している。これにより連続的調査方法の具体化によって一層確実な基盤ができた。またハワイ日系人に関しては4回の調査結果を経年的に分析し、世代の交代による内部構造の変化が確實に進みつつあることが確認された。詳しくは報告書“*The Fourth Attitudinal Survey of Honolulu Residents, 1988*”を参照のこと。

8 ABSTRACT OF PROJECT

The present study represents the fourth in a longitudinal survey of Honolulu residents by the Institute of Statistical Mathematics in Tokyo in cooperation with the University of Hawaii at Manoa. The first sample survey of 1971 included Honolulu voters of Japanese ancestry only, while the last three surveys included all registered voters in Honolulu. The report contains four chapters, beginning with "Introduction" and ending with "Concluding Remarks." The second chapter reports on highlights of the 1988 survey of all sample respondents while the third chapter focuses on Japanese Americans in a comparative perspective, i.e., how they have changed from 1971 to 1988 and how they compare with non-Japanese American compatriots.

PREFACE

The present report represents the fourth in a longitudinal survey of Honolulu voters by the Institute of Statistical Mathematics in cooperation with the University of Hawaii at Manoa. The first sample survey of 1971 included Honolulu voters of Japanese ancestry only, while the last three surveys included all registered voters in the city of Honolulu who resided in the urban areas between Koko Head in the east and the Diamond Head side of Middle Street in the west.

The present report contains four chapters, beginning with "Introduction" and ending with "Concluding Remarks." The second chapter reports on highlights of the 1988 survey of all sample respondents while the third chapter focuses on Japanese Americans in a comparative perspective, *i.e.*, how they have changed from 1971 to 1988 and how they compare with their non-Japanese compatriots. In so doing, efforts will be made also to examine how their "Japaneseness" is maintained or lost over the years and across generations, thereby providing clues to the question of what happens to Japanese culture as it is transplanted to the United States by immigrants and their posterity.

Once again we wish to express our gratitude to the Overseas Scientific Survey of the Grants-in-Aid for Scientific Research, Ministry of Education, Science and Culture for its continuing support of the longitudinal survey which made possible our pioneering efforts to carry out the first and thus far only random sample longitudinal survey of Honolulu residents (a grant under the Monbusho International Scientific Research Program, 63041128). The committee alone, however, takes responsibility for any possible errors contained herein.

The Research Committee on the Study of Honolulu Residents

Honolulu and Tokyo

March 1990

CHAPTER 1

INTRODUCTION

1.1 OBJECTIVES IN HISTORICAL PERSPECTIVE

The primary objective of the attitudinal study of Honolulu voters is derived from original efforts to characterize *Nihonjin no kokuminsei* [Japanese national character] or Japanese culture which date back to 1953. Chikio Hayashi at the Institute of Statistical Mathematics initiated the first of a longitudinal survey of Japanese adults based upon a nationwide sample of several thousand respondents, carried out every five years hence.¹ He gathered questionnaire items from what many experts offered as characteristics depicting salient values of Japanese culture.

It was an auspicious time to launch the first nationwide sample survey of Japanese adults. The Peace Treaty with Japan's former enemies was signed in 1951, and in 1953 Japan was well on its way towards the development of a new independent Japan. The latest survey of the Japanese culture series was conducted at the same time the present study was carried out in 1988. Few, if any, could have imagined what has become of Japan in the past 35-year period covered in the longitudinal study of the Japanese culture.

Signs of what was to become of Japan by the end of the 20th century became

¹ A number of publications has resulted from the longitudinal survey of this Japanese culture series. For the latest major publication, see Hayashi (1988). For the Hawaii survey results, see Suzuki et al., (1972), The Research Committee on the Study of Honolulu Residents, (1980), (1984), and Kuroda, Hayashi, and Suzuki, (1978).

evident by the early 1970's. Japan had then reached a point of economic affluence where an increasingly large number of studies was beginning to be undertaken. In 1971, the Institute of Statistical Mathematics studied for the first time what happened to Japanese emigrants and their posterities after they left from their homeland and as they settled down on foreign soil. The Institute, in cooperation with the Social Science Institute of the University of Hawaii at Manoa, initiated the first sample survey of Japanese Americans abroad. Subsequently, in 1978 an expanded version of the same study included the entire population of Honolulu's registered voters, which enabled us to place the Japanese American community within the perspectives of the whole population of the city and county of Honolulu from Koko Head in the east to Diamond Head side of Middle Street in the west.

Since then, the same survey was repeated in 1983. The current survey report thus represents the fourth in our series of efforts to capture the salient characteristics of Japanese Americans in comparative perspective. The data base from which we can compare the present study with past ones includes not only longitudinal but cross-national data as well. They include sample survey data gathered in the nationwide survey of the United States using the same questions in 1978, in European countries such as in France in 1983, in addition to Japanese survey data. That makes this survey series one of the richest data sources in the field of comparative sample survey data on cultures of the world. Hence, it is the objective of the study to understand the nature of the people who, over a period of time and across cultures, that led us to where we are today.²

² Unfortunately, this study could become the last of the series of comparative culture studies series as all the original members of the research team who worked together since 1972 fast reach retirement age.

1.2 THE DATA SOURCE

The primary data for the present study are derived from the 1988 sample survey of Honolulu voters mentioned earlier. However as indicated before, efforts will be made to make use of the past data gathered both in Hawaii as well as elsewhere over the past 35 years.

When compared with other data on Honolulu residents, ours are distinguished from others in the following perspectives:

1. The sampling frame used for our study is the list of registered voters in Honolulu and not adult citizens living in Honolulu as such. Thus we are not dealing with a general adult population as defined in census type population, which includes temporary residents, aliens and permanent residents, military personnel and dependents for whom in Honolulu is not the place of permanent residence. Thus, public opinion poll results published in newspapers such as the *Advertiser* which uses random digit dialing as the sampling frame for its periodic survey of Honolulu residents.³

³ An accelerating increase of unpublished and unlisted telephone numbers led to the recent development of random digit dialing (RDD). The first article on the subject appeared in 1964. (Cooper, 1964) Although there are several different techniques available for use on sampling for national and local surveys, random digit dialing essentially attempts to use the first three digits in a telephone number to first of all locate the particular area one desires to study. Then all efforts are made to eliminate numbers that are:

- 1) not in use, 2) used for institutions, governments, and other organizational use, and 3) used for business.

2. Unlike unsystematic studies of comparative cultures based upon case studies or historical documents, our data enable us to draw inferences about the whole population of Honolulu voters. In other words, we are not dealing with specific individuals as historians do in their efforts to record the history of individuals and communities.

3. The accumulation of past data makes it possible for us to compare diachronically and cross-culturally. For instance, four waves of the surveys carried out in Honolulu are now sufficient to apply such statistical techniques as cohort analysis to begin to separate three independent causes of change over a period of time, 1) cohort effect, 2) periodic effect, and 3) generational effect.

For example, not all telephone numbers starting with 944 are used by the East-West Center in Honolulu, while all those which start with 948 are used by the University of Hawaii. Obviously, a task of this nature requires the tedious work of checking each number beginning with any three particular digits. Hawaiian Telephone Company is not in a position to assist anyone in this regard.

Once all these data are gathered, one has a list of the population of individual telephone subscribers which then can be used for any sample.

Of course, the difficult task ahead is how to deal with irate unlisted telephone number subscribers who keep asking "How did you get my telephone number?" RDD has the advantage of being able to contact unlisted telephone subscribers - approximately 20 percent of telephone subscribers in Honolulu, but at the same time telephone interviewers must be trained enough to establish sufficient rapport to deal with their interviewees during the first 30 seconds of the interviewing.

For more detail, see Johnson and Joyslyn (1987) pp. 147, 153-4, 173 and the reference therein, Groves and Kahn (1979), Klecka and Tuchfarber (1978), Landon and Banks (1977) and Weisberg, Krosnick, and Bowen (1989), pp. 45-7.

4. The fact that we have accumulated the data thus far can serve as the base data from which future social scientists may wish to replicate at least part of the survey in their efforts to understand Honolulu voters in the future. Such is the nature of scientific enterprise.

These features should enhance efforts made by social scientists to deepen our understanding of the United States as well as Japan within a historical depth which often lacks in social scientific works and which is the target of criticism from humanities scholars. It is significant to keep in mind that the study of Honolulu represents a midpoint between the study of American culture at large and that of Japan. No culture is simple, but the study of American culture in general and that of Honolulu in particular is a challenge because of its diversity and dynamism. Honolulu's culture is affected by the impact of Japanese culture, the new influences brought about as the results of the huge Japanese investment in recent years and the old influences caused by the importation of migrant and immigrant laborers to work on plantations. Our study of Honolulu also reveals a continuing impact of the Japanese culture on Honolulu.

1.3 THE RESEARCH SITE

Honolulu is a unique city in that no ethnic or religious group constitutes a majority. Everyone is a member of some minority or another. Although census figures show that Caucasians constitute about one third of Honolulu's population and Japanese Americans approximately 23 percent (Department of Business and Economic Development, 1988, p. 42), the list of registered voters indicates Japanese Americans make up close to 40 percent of the voter population and Caucasians around one-third, giving Japanese Americans a plurality among minorities in the city. Perhaps because of that position, and Hawaii's geographic distance from the

mainland, Japanese Americans seem to maintain traditional Japanese values longer than their counterparts in the rest of the United States. While Honolulu is not "Middletown, U.S.A." by any stretch of the imagination, it is definitely an integral part of American culture, without a doubt.

As one walks or drives through the city of Honolulu, one cannot help but notice a variety of signs written in non-English languages. Probably the most common ones catering to tourists are in Japanese. There are no Japan towns in Honolulu, unlike in other cities in the rest of the United States. Indicators of Japanese culture are omnipresent in many parts of the city and are not limited to a Japan town, as is the case elsewhere.

U.S. mainlanders who settle in Honolulu are largely found among business executives and professionals, while the low end of the social strata are supplied by immigrants from Asia. Hawaii's indigenous population does not fare well in Hawaii today. The relatively small size of minority ethnics other than Caucasians and Japanese Americans in our samples makes it impossible for us to focus on any other groups.

1.4 THE QUESTIONNAIRE

The Appendix contains a copy of the Questionnaire employed in the 1988 sample survey. Although many items in the Questionnaire were derived from the questionnaire constructed for the longitudinal study of the Japanese culture started in 1953, many have been added to the 1988 survey of Honoluluans. Many items have also been deleted from the original version for several reasons. First, what is relevant and appropriate for Japanese are not necessarily relevant to Americans. Certain concepts and customs used in the original questionnaire are irrelevant to Americans

even to Japanese Americans. Second, likewise, what made perfect sense in the 1950's on certain items no longer makes sense in the 1980's.

The process of modernization, or whatever else one uses to describe the urbanization of many towns and cities throughout the world, places a constraint on those who conduct the survey in that it becomes an increasingly difficult task to conduct interviews with those who live in high-rise condominiums which are almost invariably secured from strangers, including interviewers attempting to find potential respondents. Most who live in such places are also likely have paid extra to have their names removed from telephone directory. This and other considerations, such as the cost of in-person interviewing, compelled us to minimize the number of items in the Questionnaire. All new items added in the 1988 survey were pretested prior to finalizing the questionnaire.

In addition to the Japanese culture study project, items were taken from the following sources: CREDOC [Centre de Rescherche pour l'etude et L'observation des Conditions de vie] in Paris, NORC [National Opinion Research Center] distributed by the Roper Public Opinion Research Center, and items we developed for the Honolulu survey.

Our initial survey of Japanese Americans in Honolulu took place as people started feel increasingly concerned for our environment as we faced the first energy crisis of 1973. Since then, the second energy crisis came and went. By the mid-1980's the United States, which used to be the largest creditor nation, quickly turned into the largest debtor nation in the world while Japan replaced the United States as the largest creditor nation.

Change is inevitable. The question is how to detect what is relevant and what is irrelevant as we try to develop the Questionnaire. As citizens, our task is to take part in inevitable changes in such a manner that resultant futures will be closer to our preferred futures. Hopefully the Questionnaire we developed can contribute to the

efforts of those who are concerned with the future of the world as well as social scientists who are interested in developing theories that can explain regularities in global social dynamics.

1.5 THE UNIVERSE

The universe or population of 1988 Honolulu remains the same as that of the 1978 survey and the last two successive surveys, *i.e.*, English or Japanese-speaking voters who are registered to vote in Honolulu from Koko Head in the east to Diamond Head (east) side of Middle Street in the west - the most urbanized sector of the city and county of Honolulu.⁴ As far as the geographic area is concerned, the population of our survey has remained the same since its inception in 1972. The only difference is that the initial survey dealt only with voters of Japanese ancestry, whereas the last three surveys have encompassed the entire population of those who are registered to vote in the area.

Periodic redistricting of the area has resulted in including only those voters in the 38th and 39th Districts who reside in the specified area of the city who were included in the 1988 survey. Although district designation has changed over the time covered, the geographic parameters remains the same for all four surveys.

⁴ The entire island of Oahu is the city and county of Honolulu where the State Capitol is located. Approximately 80 percent of Hawaii residents live on Oahu while the remaining residents live in neighbor islands. The area covered in our survey, while constituting a small portion of the island, has roughly a half of Oahu's population.

1.6 SAMPLING AND INTERVIEWING

As done in the previous surveys, a letter requesting a taped copy of the current list of registered voters was written on April 27, 1988 to the Director of the City Clerk's office in the city hall. The tape was made available, and has been copied at the University of Hawaii Computing Center. The copy was sent to the Institute of Statistical Mathematics in time for sampling. In other words, the current list of the registered voters was used as the sampling frame.

A list of sample respondents who resided in the 21st through 39th districts ($N = 2,001$) was sent to Honolulu after the respondents were selected at random from the computer tape. The list contained those who do not belong to the population, who live outside of the parameters specified for the population but who are found within the 38th and 39th districts. Then, those sample respondents who live west of Middle Street were deleted from the sampling by hand. Those eliminated were in the third and fourth precincts in the 39th District ($N = 32$) and in the 4th and 5th precincts in the 39th District ($N = 27$).

Of the remaining sample respondents ($N = 1,942$), we decided to further select those sample numbers that are odd numbers, or those for which the last digit was 0; e.g., 0001 and 0010 were selected to be interviewed. This process gave us a total of 1,163 potential respondents. All efforts were made to interview these respondents.

The interviewing commenced in late June and the bulk of the interviewing was completed before the holiday season. Renewed efforts were made after the holiday season to complete the interviewing. The labor shortage in Honolulu since 1978 made it difficult to recruit qualified and willing interviewers -- the rate of unemployment remained under three percent during the interviewing period.

Table 1.1

Disct	Cmptd	Mvd/NA*	The Completion Rate by District				Refd	Total
			Dead	Ill**	Away***	Not home

Total	499	296	3	26	11	138	197	1,163

NA* = Either unable to locate, to speak English or no longer exist (N = 9). Ill** =

Unable to interview due to illness Away*** = On trip or away for college.

After we eliminated those who were found to have moved out ($N = 296$) and deceased ($N = 3$), we were left with 864 potential respondents. Of this number, we succeeded in securing 499 usable and verified questionnaires. All questionnaires were verified for validity by telephone and on two dozen cases through the mail. One hundred ninety seven potential respondents refused to be interviewed, which accounts for 22.8 percent of the sample. One hundred thirty one respondents were "never home" (15%). All interviewers were instructed to visit at least three different times. In most cases, more than three visits were made. Several cases required more than a dozen visits before an interview was secured. At least on three occasions, two of our interviewers secured three interviews from those who initially refused to be interviewed. Ten respondents were willing to participate in the survey but they were unable to comprehend the questionnaire because of their English language deficiency.

About a half dozen Japanese Americans were interviewed in Japan using the Japanese version of the questionnaire. Of 499 respondents we were able to secure interviews from busy professionals including two physicians, two attorneys, and a business executive who spends only one day out of the week on Oahu. In order to verify the interview, three calls were made to Maui to speak with the respondent who spends six days a week there. Another international business executive lives in a Waikiki Hotel. Our interviewer tried to catch him for two months, leaving messages and phoning him. He never said "No," which kept the interviewer's hopes alive. Finally he consented to be interviewed at a hotel restaurant. At least several irate calls were received during the survey which required patient explanation and apologies because of our interviewers' persistence and determination.

We were unable to interview 365 designated sample respondents. They include the ill, hard of hearing, retarded, senile, out-of-towners, those who maintain two or more jobs, have dogs, security so tight no one can get near the dwelling unit or tight

Table 1.2

security condominiums without telephone numbers.^s As new condominiums continue to rise and population intensity keeps up in Honolulu, there are no signs that survey work will get any easier in years to come.

One accident occurred in the fall when a woman interviewer was bitten by a leashed dog which suddenly attacked her on the sidewalk, and refused to let her go. Fortunately, she was wearing blue jeans and the injury sustained was not terribly serious, but left a scar and required medical care. Much paper work was done to properly process legal papers to take care of insurance companies requests. Fortunately, none of our interviewers were involved in a car accident or any other serious accident.

Table 1.2 is constructed to show the extent to which the final sample respondents are distributed among different election districts in relation to effective sampling and population figures for each district. What we can learn is that middle class areas are slightly better represented than lower class residential areas -- a normal phenomenon in sampling and the interviewing process in much of the world.

There is no doubt that we can improve but there are obstacles on both ends of the social class scale. It is nearly impossible to get access to the highest class of people who live with electronic gates surrounding their property parameters. Likewise, our interviewers found some rented apartments in lower class neighborhoods where things were so scattered on the floor that it was difficult to find safe places to step. Dishes were stacked on sinks so high that the sinks were invisible. This is a perennial problem that needs to be solved somehow.

In short, yes we did encounter problems of access at the top and bottom of the

^s Particularly those who reside in Black Point in the Diamond Head area who have their homes by the beach. One cannot go beyond an outside gate or private road.

social structure. Nevertheless we did our best to overcome them, as evidenced in the successful interviewing of attorneys and physicians from whom it is also difficult to obtain interviews.

CHAPTER 2

HONOLULU VOTERS IN COMPARATIVE PERSPECTIVES

2.1 HONOLULU VOTERS IN THE LATE 1980'S

This chapter contains several components. First, it will report on new items that were added to the Questionnaire for the first time. Second, it will describe traceable changes that occurred since the last survey was conducted in 1983. Third, we will focus on how Japanese Americans are both similar to and different from the rest of Honolulu's population in their values, attitudes and preferences. Fourth, we will look at self-assessment of social class and how it relates to various items in the Questionnaire in view of the fact that it relates to a large number of items.

It should be noted that reports incorporated in the chapter still represent preliminary findings based on cross-tabulation of the data only, and not those of multivariate analysis, which may prove what is reported here inadequate and false. The caveat, of course, is not to deny the value of the results of the cross-tabulation data included herein.

2.2 NEW ITEMS

Since most items added to the 1988 Questionnaire are similar in nature in that they are largely concerned with values associated with the industrial era as opposed to the postindustrial era. We shall simply present them in the order they appeared on the Questionnaire.

Q 08: Respondents were asked to choose between two sets of four values: 1)

"Maintaining order in the nation," 2) "Giving the people more say in important governmental decisions," 3) "Fighting rising prices, and 4) "Protecting freedom of speech." The first and third items represent values of the industrial era while the remaining two symbolize those of the postindustrial era.¹ The items were developed to how changes in industrial structure affect its value system.

The frequency distribution of the item 08 show that percentages of the response are 1) 35 percent, 2) 27 percent, 3) 20 percent, and 4) 12 percent, respectively. It appears that Honolulu voters are still in the industrial era by Inglehart's standard. They preferred industrial era values (55%) over the postindustrial era values (39%).

A second observation here is that methodologically speaking it may have been useful to have the order of the response categories altered in such a manner that each response category will have an equal chance of being picked by the respondents.²

Honolulu concern for rising prices is understandable in view of the high cost of living in relation to the rest of the United States. The June 1987 data for a "market basket" of 35 common food items studied in Honolulu in relation to other U.S. cities indicates that they pay 26.6 percent more than those who live in the rest of the rest of

1 This is an item developed by Inglehart (1977).

2 As one can see, the first response category received the highest number of responses followed by the second and others successively. This could have been caused by the response set tendency of the respondents. However, we really have no way of knowing. It could very well be that this is what they would have responded, the same way, regardless of the order of the response categories. If the item is to be repeated in the future, we need to pay attention to this in order to be able to eliminate this possible source of error.

the United States, while their wages are often below the U. S. average. (Department of Business and Economic Development, 1988, p. 397)

We now move to the question of choosing between more free time or money.

Q 17:

If you had to choose between more money and free time, which would you choose?"

- 1) More money
- 2) More free time

The respondents are almost equally divided on this issue of money and free time, i.e., 46 percent chose the former while 48 percent selected the latter. The responses relate to the level of formal schooling. A high 60 percent of those with graduate school educations preferred free time over money, whereas only 36 percent of the elementary school graduates did so.

Professionals by and large continue to lead busy lives, despite the development of modern technology to make their work more efficient. But unionized workers have succeeded in reducing their working hours, partly as a result of the development of modern technology.

Q 19:

Which one of these opinions comes closest to your own?
[Show card D]

- 1) No matter how much money you have life without work is wasted
- 2) As long as you have money life isn't wasted if you don't have a job

The question here is which is more important: work or money. Where does one find her or his purpose in life? A large majority of 62 percent chose work rather than money. Only one-third of the respondents (32%) chose the second answer. Twice as many Honolulu voters find meaning in their work rather than money.³ What this

³ A related question which was asked in the 1983 Questionnaire and repeated in the 1988

suggests is that Honoluluans look for more than means to earn living in their work. Employers have the responsibility to provide their employees with meaning in life if they are to respond to the apparent need of their employees to satisfy their psychological need, as manifested in this finding.

This raises a concern for Hawaii's job market which depends largely on tourist-related industry and its future. Oahu's unemployment rate has often dipped below three percent in the past several years, creating a shortage of labor in many industries. However, many of the shortages are at lesser-skilled and non-professional levels of employment which are not likely to give one the "feeling of accomplishment" people desire.

Oahu's problem is to generate jobs that give a feeling of achievement and high enough salary to pay for the high cost of living on the island. Unfortunately, too many jobs on Oahu neither satisfies the psychological satisfaction one seeks nor pay enough to compensate for the higher cost of living in Hawaii.

Q 25:

There is a story of an idle grasshopper and a diligent ant in one of Aesop's fables. When winter came, the grasshopper who spent

survey, has focused on priority in work. The response categories provided were:

- 1) A good salary so that you do not have any worries about money.(14%)
- 2) A safe job with no risk of closing down or unemployment (13%)
- 3) Working with people you like (16%)
- 4) Doing an important job which gives you a feeling of accomplishment (55%)

As can be surmised, a majority preferred the last response category as their prime value on a feeling of achievement over good salary, safety and esprit de corps. The results of the 1983 revealed about the same findings. All these suggest that people in Honolulu are looking for life meaning in their work and do not consider their job to be simply a means to earn a living.

the summer singing came for help to the ant who worked all through the summer. The ant could have given either of the following two replies. Which one of the two do you think suits you best as the conclusion of the story?

- 1) The ant sends the grasshopper away because it is only natural that the grasshopper should suffer now.
- 2) The ant first admonishes the grasshopper, saying, "You are to blame for having been idle. You should work harder from now on" and then shares his food.

An overwhelming number of the respondents consisting of 91 percent chose the second response of giving the grasshopper food. A small minority of seven percent informed their intent to send away the grasshopper empty handed. There are many endings to this story attributed to Aesop. It looks as if the story is to be well received in Hawaii, the story must end by using the second ending in tune with the spirits of Aloha.

Q 27:

Using this scale can you tell me how important each of the following is to you? [Show card I]

- a. Your immediate family and children if you have any
- b. Career and work
- c. Free time and relaxation
- d. Friends and acquaintances
- e. Parents, brothers, sisters and other relatives
- f. Religion and church
- g. Politics

The respondents were shown a card which contains a scale of "1" through "7" ranging from "Not important at all" ("1") to "Very important" ("7").

Since most of these items are important to most respondents, let us cite percentages of the response category of "Very important" ("7") in descending order. A high 85 percent of the respondents chose the category scale value of the "7" for

their immediate family and children. The category receiving the second highest percentage was "Parents, brothers, sisters, and other relatives" with 62 percent. The rest of the items, with the exception of "politics" which received only 10 percent, attracted approximately one-third of the responses as follows: "Career and work" 34 percent, "Friends and acquaintances" 33 percent, "Free time and relaxation" 32 percent, and "Religion and church," with 31 percent.

What we can infer from these findings is that Honolulu voters value their family, particularly their immediate family, more than any other items included in the question. The respondents' career, free time and relaxation, friends, acquaintances, religion and church occupy about the same priority in their life which definitely is centered around the nuclear family.

2.3 CHANGING ATTITUDES

Before we begin presenting attitudes that have changed from 1983 to 1988, it ought to be made clear that there are more items that show no difference from the earlier surveys of 1972, 1978 and 1983. Let us cite at least a couple of them to demonstrate. An item of interest which has not changed much from the previous surveys is on attitudes toward life. The following is the way respondents answered the question with percentages representing the 1983 figure first and then the 1988 figure next:

Q 22:

There are all sorts of attitudes toward life. Which one of the following statements would you say comes closest to your way of life?

1) work hard and get rich (10%, 10%)

2) Study earnestly and make a name for yourself (6%, 5%)

- 3) Don't think about money or fame; just live a life that suits your own taste (35%, 33%)
- 4) Live each day as it comes, cheerfully and without worrying (33%, 36%)
- 5) Resist all evils in the world and live a pure and just life (10%, 9%)
- 6) Never think of yourself; give everything in service of society (3%, 2%)

There have been virtually no changes over time as far as this and many other items are concerned. The fact that there is hardly any change between the results of the 1983 and the 1988 surveys indicates the highly reliable quality of our longitudinal survey data. Honoluluans definitely prefer to live a life that fits their tastes without worrying -- perhaps a formula for long life expectancy.

In previous section, a reference was made to the job market. Here are some feelings people have of their standard of living:

Q 02:

Compared with ten years ago, do you think your standard of living is:

- 1) Much better (51%, 40%)
- 2) Slightly better (28%, 30%)
- 3) Same (14%, 20%)
- 4) Slightly worse (6%, 7%)
- 5) Much worse (1%, 1%)

One can observe slight changes over the years toward less optimism, even then this is remarkable in face of a little increase in per capita income Hawaii achieved in recent decades. The State of Hawaii's Data Book, 1988 (p. 369) informs us that per capita income from 1970 to 1987 rose 217.1 percent in current dollars but only 12.9 percent in constant dollars. That comes to less than one per cent per year increase in personal per capita income in Hawaii for the past two decades as far as "objective" data can determine.

Now let's move on to present changing attitudes found over the year. They are

much smaller in number in relation to those items that did not show appreciable change. Only those which showed over 15 percent are reported herein.

Q 04:

Do you think people will become more happy, or more unhappy?

- 1) More happy (41% --> 28%)
- 2) More unhappy (35% --> 28%)
- 3) No change (15% --> 33%)

It appears as if Honolulu voters are less optimistic about their future state of mind in 1988 than they were five years hence. Those who said they will be more happy decreased from a plurality of 41 percent to less than one-third of 28 percent of the respondents with a corresponding increase in the number of respondents who chose the response category of "no change" from 15 percent to 33 percent. This may reflect an era within which the United States is finding itself transformation from the largest creditor nation in the world in the early 1980's, when President Reagan assumed office to the largest debtor nation in the world in the last half of the decade. A corresponding rise in the financial power of Japan was undeniable as Hawaii experienced a sudden rise in the amount of investment by Japanese investors following the mid-decade transformation. Perhaps the public is sensing this transformation which resulted in the decreased optimism.

Q 12:

If you had no children, would you think it desirable to adopt a child in order to continue the family line, even if there is no blood relationship? Or do you not think this is important?

- 1) Would adopt (52% --> 49% --> 55% --> 40%)⁴

⁴ The first figure of 52% was taken from the 1972 survey results when the population of the survey was limited to Japanese American voters.

- 2) Would not adopt (38% --> 35% --> 43%)
- 3) Depends on ... (5% --> 6% --> 13%)

The percentage of people who felt the need to adopt a child has attenuated from a majority of 55 percent in 1983 to a plurality of 40 percent of the respondents. What seems to have happened is that the percentage of Japanese Americans who felt the need to adopt a child in order to continue the family line has declined from 55 percent in 1972, to 49 percent in 1978, to 49 percent in 1983 and to 33 percent in 1988.

As non-Japanese American respondents, the percentage of those who would adopt declined from 50 percent in 1978, to 58 percent in 1983 to 45 percent in 1988. In other words, there has been larger drops in the number of people who believe in continuing their family line by adopting a child among Japanese Americans. The percentage among them has attenuated from over a half of the respondents (55%) in 1972 to one-third (34%) in 1988. Is ethnic awareness on decline among Japanese Americans? It could very well be.

The next two items deal with nature and environmental concerns that reflect the transformation Honolulu is perhaps experiencing along with the rest of the world.

Q 43:

Here are three opinions about man and nature. Which one of these do you think is closest to the truth?

- 1) In order to be happy, man must follow nature (21% --> 30% --> 26% --> 48%)
- 2) In order to be happy, man must use nature (68%, --> 59% --> 67% --> 43%)
- 3) In order to be happy, man must conquer nature (6% --> 4% --> 4% --> 4%)

There was hardly any change from 1972, but an abrupt change has taken place in the 1980's as Honoluluans seem to have shifted from their utilitarian view of nature to one of simply following nature rather to think of their own use of nature. Now more people who believe that they should follow nature rather than use nature. This was a

remarkable transformation.

Q 60:

How important is environmental preservation to you?

- 1) Very important (59% --> 73%)
- 2) Important (38% --> 25%)
- 3) Not very important (2% --> 1%)
- 4) Not important at all (0% --> 0%)

This item too deals with environment/nature in which we humans reside. There has been a stepped-up campaign by various environmental groups for the need to maintain ecological balance on earth in the past two decades. The message seems to be finally getting through the public as we approach the last decade of the 20th century. The fact that these two related questions show remarkable changes suggest that changes are unlikely to be the artifact of sampling or non-sampling error but reflect true changes in the attitudes of Honolulu voters. This is a remarkable transformation of the peoples' attitudes toward environment -- a great victory for cleaner and healthier environment.

One more set of changes observed also reflects the fundamental shift in world politics which has taken place toward the end of the last decade of the 80's.

Q 09:

From the answers on this card B, to what extent do you worry, either for yourself or for your family, about each of the following?
[Card B]

d Unemployment

- 1) Very much (28% --> 14%)
- 2) Somewhat (22% --> 27%)
- 3) Slightly (23% --> 25%)
- 4) Not at all (25% --> 30%)

e War

- 1) Very much (44% --> 27%)
- 2) Somewhat (26% --> 26%)
- 3) Slightly (19% --> 26%)
- 4) Not at all (11% --> 18%)

The decline of unemployment and the shortage of labor in Honolulu in the past several years has been noted due in part to the sharp rise in Japanese investment activities following the rise in the value of yen in relation to the U.S. dollar. This was a result of the so-called the "G 7"'s finance minister conference in New York in the fall of 1986 attended by former Secretary of Treasury James Baker and former Finance Minister Noboru Takeshita among others.

As the Reagan era came to an end in the beginning of 1989, it was obvious that the two superpower relations had drastically changed, as symbolized by former President Reagan's characterization of the Soviet Union being the "Evil Empire" has shifted to a much more friendly characterization and his friendship with the Soviet leader. The cold war was coming an end finally after over 40 years of existence. Of course, we now are more certain in February of 1990. But the signs were there by the time the survey was carried out in 1988. This is reflected in the sharp decline in the percentage of people who worried about war.

2.4 JAPANESE AMERICANS AND OTHERS IN HONOLULU

Japanese Americans constitute a plurality among Honolulu voters with 35 percent to 40 percent of the total voter population identifying themselves as Japanese Americans. It should be, noted, however, that the census statistics gives much smaller figures of around 25 percent. (*e.g.*, Department of Business and Economic Development, 1988, p. 42)

The reason for this discrepancy lies in a large number of Caucasian and other ethnic groups that comprise the military and its dependents in Hawaii who are included in the census statistics but are not registered to vote for several reasons such

as high state taxes and the temporary nature of their stay in Hawaii. In any case, over the years after conducting a number of surveys in Honolulu, our estimate of the voter population by ethnic groups is that Japanese Americans constitute a plurality with close to 40 percent while Caucasians make up about one-third.

The 1988 survey reported about 36 percent of the respondents were Japanese Americans and 28 percent, Caucasians.⁵ Other minorities are as follows in numerical order: Chinese Americans 12 percent, Filipino Americans seven percent, Hawaiians five percent, "mixed" five percent, and others seven percent. In this section, we shall compare the plurality population with the rest of the population and point out differences we found between them. It may be useful to keep in mind that non-

5 It is interesting to note that for the first time in the past four surveys since 1972, we found one respondent of Okinawan ancestry who identified herself as non-Japanese. Of course, we respected her designation and so coded in the data. Perhaps it should further noted that Okinawans in Hawaii maintain their own identity apart from the rest of Japanese Americans in many ways. As the survey was underway, efforts were made by Okinawans to build their own cultural center in Waipahu while the Japanese Cultural Center of Hawaii was also being established. Okinawans on their own raised the funds necessary to build their own cultural center, a remarkable feat. Sensitive relations remain between Okinawans on the one hand and the rest of Japanese Americans on the other, even today, that were carried over years from the early immigration days.

This year marks the 90th year of Okinawan immigration to Hawaii. For a special issue which discusses among other things the tremendous *esprit de corps* that binds together "uchinanchu's" cohesive power, see *The Hawaii Herald* (February 16, 1990). The issue includes an interview with Professor Franklin Odo who explains how Okinawans have developed a powerful identity apart from the rest of the Japanese immigrants and their posterities. (February 16, 1990, pp. 12-4)

Japanese Americans are divided into the following groups: Island-born Caucasians 11 percent, mainland-born Caucasians 30 percent, foreign-born Caucasians three percent, Chinese 18 percent, Hawaiians eight percent, Koreans two percent, Portuguese two percent⁶, Puerto Rican one percent, "Mixed" six percent, Filipino seven percent, and others 12 percent.

There are first to fourth and fifth generations of Japanese Americans. Forty-eight percent are the first and second generations, while the remaining 52 percent made up the third and successive generations.

What follows is a series of reports on differences found between Japanese Americans and the rest of the respondents. A decision was made to report only those results that showed close to at least 15 percent difference between the two groups.

Q 32:

Some people say that with the development of science and technology, life becomes more convenient, but at the same time a lot of human feeling is lost. Do you agree with this opinion or do you disagree?

- 1) Agree
- 2) Disagree
- 3) Undecided

A large majority of Japanese Americans (81 percent) agree with the statement while only 58 percent of the rest do so. Japanese Americans seem to be more sensitive to the possible loss of human feeling, which they may value more highly than others in the population. A related finding is reported next.

⁶ Portuguese is not included among the so-called "Caucasians" in Hawaii's lexicality because of the place of the Portuguese in Hawaii's history. The Portuguese workers were brought into Hawaii to work on sugar plantations as its supervisors or "luna," under whom Asian migrant workers worked. They did not come to Hawaii as Christian missionaries.

Q 56:

In the future, computers will change our lives. How do you feel about this development?

- 1) A desirable thing (J:60%, NJ:46%)
- 2) An understandable but inevitable thing (39%, 50%)
- 3) A regrettable and dangerous thing (1%, 3%)
- 4) Other (0%, 1%)

What strikes us is that although Japanese Americans are worry about the loss of human feeling which may come as an integral part of scientific and technological progress, they are at the same time more willing to welcome the advent of computer to society. In other words, they worry but they are more willing to accept the progress of science and technology. They obviously are not against scientific and technological progress. This worrying aspect of Japanese Americans lead us to the next item in the Questionnaire.

Q 53:

Generally speaking, would you say that most people can be trusted or that you can't be too careful in dealing with people?

- 1) Can be trusted (J:60%, NJ:46%)
- 2) Cannot be too careful (39%, 50%)
- 3) Other (1%, 3%)

Japanese Americans tend to be more trusting people than others who are more cautious. They seem as though they are willing to trust people more than they trust science and technology, at least comparatively speaking in relation to other ethnics. Where did this come from? Is this the kind of trust that led the second generation Japanese Americans to volunteer to serve in the U.S. military during World War II while many of their parents were behind barbed wire for no reason other than their being ethnic Japanese?

A startling and intriguing finding is their attitudes compared to behaviors when compared to others in Honolulu with respect to politics. Two questions concerning

political interest and political behavior were asked several questions apart in the Questionnaire as follows:

Q 66:

How interested are you in politics?

- 1) Very much (J:12%, NJ:24%)
- 2) Somewhat (54%, 47%)
- 3) Little (27%, 24%)
- 4) None (6%, 4%)
- 5) Other (1%, 1%)

Q 73:

How often do you attend political rallies, campaign fund-raising events and the like?

- 1) Very often (J:2%, NJ:7%)
- 2) Sometimes (23%, 24%)
- 3) Rarely (43%, 33%)
- 4) Never (32%, 36%)

What is of interest is that although Japanese Americans show somewhat less interest in politics (attitude), their actual participation in political process (action/behavior) is not significantly less than the rest. A similar finding was discovered in our earlier studies as well. The remaining findings are derived from more obviously from their Japanese heritage.

RELIGION: The Japanese are more likely to be Buddhists (28%) than others (2%) and less likely to be Catholic (J:8%, NJ:31%). Perhaps what is significant is that unlike all other ethnics who maintained their religion after they settled in the United States, many Japanese Americans have been converted to Christianity. However, this has been reported earlier in our monographs. (Research Committee on the Study of Honolulu Residents, 1980, 1984, 1986)

BIRTH PLACE: A high 93 percent of Japanese Americans are born in Hawaii, whereas only 48 percent of the rest of Honolulu population is (Q79). Approximately one-third of Japanese Americans (33%) "regularly" watch Japanese television

programs in Honolulu while only seven percent of the others do (Q87). A majority consisting of 60 percent of non-Japanese Americans in Honolulu have never visited Japan before. A comparable figure for Japanese Americans is only 38 percent, a minority (Q88). One item less well-known is the fact that Japanese Americans are less well-educated than other populations in Honolulu (Q81). We found that 62 percent of Non-Japanese Americans have attended a college or university while only 52 percent of Japanese Americans did so. A more significant difference is that 22 percent of Non-Japanese Americans attended graduate school as opposed to only 14 percent of Japanese Americans who did so. There is a plurality (30%) of Non-Japanese Americans which consists of mainland-born Caucasians who come to Hawaii as professionals and managers and they, of course, are much better educated than the cross-section of the United States.

One of the items included in the 1988 survey was a question on self-assessment of social class. We shall now see how social class relates to other items included in the Questionnaire.

2.5 SOCIAL CLASS AS AN ATTRIBUTE

The self-assessment item for social class reads as follows:

Q 16:

From the answers on this card, how would you classify your standard of living? [Show Card C]

- 1) Upper (3%)
- 2) Upper Middle (28%)
- 3) Middle (58%)
- 4) Lower Middle (9%)
- 5) Lower (1%)

The first two categories (1 and 2) are collapsed into one category to form upper

class as were the last two categories (4 and 5) into one category to form lower class.⁷ Every variable was then run against the social class. What follows are items that showed class made the difference of at least 20 percent.

First, we will look at items that are related to lifestyle questions.

STANDARD OF LIVING:

Q 02 Compared with ten years ago, do you think your standard of living is:

- 1) Much better (Upper 53%, Middle 37%, Lower 18%)
- 2) Slightly better (U 28%, M 31%, L 33%)
- 3) Same (U 13%, M 23%, L 29%)
- 4) Slightly worse (U 5%, M 6%, L 16%)
- 5) Much worse (U 1%, M 1%, L 4%)

A majority (53%) of the upper class respondents thought that their standard of living is "much better" compared with ten years ago while only 37 percent of the middle class and only 18 percent of the lower class respondents think so. Sixteen percent of the lower class respondents believe that their standard of living is "slightly worse" while only five percent of the upper class respondents think so. This finding matches more or less with what took place under former President Reagan's administration with his tax and budget policies.⁸ Objective reality appears to coincide

⁷ Thus we ended up with three categories of social class as follows: upper class (31%), middle class (58%), and lower class (10%).

⁸ A recent tax study by the nonpartisan Congressional Budget Office reports that the poorest 20 percent of Americans have lost their real income by 3.2 percent in the 1980's while their net federal tax rate went up by 16 percent. Their pre-tax income in the 1980's was \$7,725. While this change was taking place under the Reagan administration, the richest fifth whose average pre-tax income was \$105,209,000 enjoyed a 31.7 percent increase in their income and a 5.5 percent reduction in their net federal tax rate. There is no question that the rich are getting richer and the poor

with subjective reality of the rich and poor alike -- an interesting phenomenon.

QUALITY OF LIFE:

Q 23 How do you feel about the quality of life in the area where you live?

- 1) Very satisfied (U 54%, M 28%, L 18%)
- 2) Satisfied (U 42%, M 63%, L 68%)
- 3) Dissatisfied (U 3%, M 7%, L 12%)
- 4) Very dissatisfied (U 0%, M 1%, L 4%)

It is apparent that upper class respondents are more likely to be "very satisfied" "with the quality of life" than lower class respondents. A majority of the upper class respondents (54%) are satisfied as opposed to only 18 percent of the lower class respondents. Also they are more dissatisfied with the quality of life where they live than their upper class compatriots.

Next, we will examine relationships between social class and other social and demographic attributes such as birth place, education, occupation, and ethnicity.

BIRTH PLACE (Q77): Upper class respondents consist of 50 percent Hawaii-born, 37 percent mainland-born, and 13 percent foreign-born. Middle class respondents are composed of 74 percent Hawaii-born, 16 percent mainland-born, and 14 percent foreign-born. Lower class respondents are made of 55 percent island-born, 14 percent mainland-born, and 29 percent foreign-born. The great majority of the island-born are middle class respondents while the majority of the mainland-born are upper class.

If we treat birth place as the independent variable, we find that the mainland-born (51%) are most likely to be upper class, followed by the foreign-born (31%) and

are getting poorer but less of the rich person's bounty and more of the poor's mite is going to taxes. For more detail on this news item, see *The Sunday Star-Bulletin and Advertiser* (February 18, 1990), A18).

the island-born (24%). Island-born respondents (68%) are most likely to be middle class, followed by foreign-born respondents (46%) and then mainland-born (43%). The foreign-born (23%) are most likely to be lower class in relation to island-born (9%) or the mainland-born (6%). The place where one is born is an important factor affecting one's social class position in Honolulu as perceived by the respondents themselves. After their birth, what is important in the socialization process is how much and how good formal schooling one receives in one's preparation for adult life in society. We shall look at the level of education as it relates to social class identification.

EDUCATION:

Table 2.1
Education and Class

Class	Jr Hi Sch	Sr Hi Sch	Bus/Tech	College	Grad Sch
Upper	11%	18%	29%	32%	52%
Middle	73	69	67	56	44
Lower	16	13	4	12	4
Total	100% (44)	100% (107)	100% (55)	100% (194)	100% (97)

Entries in Table 1 makes it clear that there is a positive relation between education and social class identification. The higher the level of education one acquires, the higher one's social class identification. A majority (52%) of the graduate school graduates are identified as higher class respondents, while only 11 percent of the respondents do so among those who received less than high school education.

OCCUPATION: Occupational groups that yielded upper class identification in order of higher percentage are as follows: small businessmen (58%), "managerial" (54%), professional (40%), "not gainfully employed" (26%), service worker (23%), skilled worker (19%) and clerical worker (14%). It is obvious that manager/proprietors

including smaller enterprises, high government officials, and professionals are most likely to be upper class.

ETHNICITY: Although the small sample size makes it impossible for us to claim any degree of accuracy, perhaps we can suggest that Caucasians (46%) are most likely to be upper class, followed by Chinese Americans (33%), Portuguese (27%), Japanese Americans (24%), Filipino Americans (19%) and Hawaiians (13%).

SCIENCE AND TECHNOLOGICAL PROGRESS: Upper class respondents are much more positively oriented toward technological progress in society than lower class respondents.

Q 55 To what extent do you think that science and its applications bring improvements to your everyday life?

- 1) A lot (U 84%, M 68%, L 63%)
- 2) A little bit (U 15%, M 29%, L 37%)
- 3) Not at all (U 0%, M 1%, L 0%)

Q 56 In the future, computers will change our lives. How do you feel about this development?

- 1) A desirable thing (U 55%, M 41%, L 35%)
- 2) An understandable, but inevitable thing (U 41%, M 52%, L 49%)
- 3) A regrettable and dangerous thing (U 3%, M 5%, L 14%)

There are several inferences to be drawn from these figures above. First, Honolulu voters by and large have positive attitudes toward science and technology. Second, they are not yet very certain about the computer age, at least not as certain as they are of science and its application to everyday life in general. Third, the rich are a lot more positive about science and its applications to everyday life as well as computers. This may be caused by two factors. The rich are better educated and they can see the advantage technological progress brings to society. In addition, they are more likely to be the first recipient of such progress.

POLITICAL RALLIES: The last item found to be related to social class is the

question of how often one attends political rallies.

Q73 How often do you attend political rallies, campaign fund-raising events and the like?

- 1) Very often (U 7%, M 4%, L 6%)
- 2) Sometimes (U 33%, M 20%, L 22%)
- 3) Rarely (U 34%, M 39%, L 28%)
- 4) Never (U 26%, M 37%, L 45%)

Only one out of four never attends political rallies among upper class respondents as opposed to nearly one half of the lower class respondents. Apparently, the higher the class more one takes part in politics beyond voting.

In accordance with the original intent of our longitudinal study of Honolulu voters, we will now focus on Japanese Americans and explore the extent to which they maintain their Japanese characteristics and other related subjects.

CHAPTER 3 JAPANESE AMERICANS

IN HISTORICAL PERSPECTIVE, 1971-1988

3.1 THE ORIGINAL OBJECTIVE: A SEARCH FOR JAPANESE VALUES AMONG JAPANESE EMIGRANTS

The original intent of the research team in 1971 was to explore the question of what has happened to Japanese emigrants who settled abroad in general and in Hawaii. Furthermore we were interested in finding out what happens to the younger generations of the Japanese immigrants in particular. Do they become completely Americanized or do they preserve at least some Japanese values? If they retain any Japanese value, what is it and how much of it do they retain?

What constitutes the core of Japanese values abroad as Japanese emigrants settled on a foreign soil? Are there differences between successive generations with respect to Japanese values? Are the Sansei more Japan-oriented than the Yonsei, for example? These are concerns that led to the study of the initial survey conceived in 1971 and carried out in 1972.

This chapter will look at how our findings have changed and not changed over the years with respect to these concerns. Also explored is the generation gap between the older generation, consisting of first and second generation Japanese Americans, and younger generations.

The same scale developed earlier was used to measure Japanese values among the 1988 Japanese American respondents.¹ The items used in the constructing the

¹ For a detailed description and development of the scale, see The Research Committee on the Study of Honolulu Residents, 1986, Chapter 4, pp. 56-62.

scale were exactly the same as ones employed in the past, with the notable exception of an item asking about the frequency of tries to Japanese movie theaters. The item became moot, since Japanese movie theaters as such no longer exist in Honolulu. The advent of so many Japanese television stations broadcasting Japanese movies and the development of video tape rentals made the Japanese movie theater obsolete and the last remaining theater finally closed its doors several years ago.

The same scaling technique developed by Chikio Hayashi called "correspondence analysis" was employed again to develop the scale of "Japaneseness" or Japanese values. (Lebart, Morineau, and Worwick, 1984)

It is not our intent to repeat what we already said in our earlier report. But perhaps it is necessary to briefly identify what constitutes the core of "Japaneseness" among Japanese Americans. What we found is that the use of written language in writing letters, doing mental arithmetic in Japanese and the active use of Japanese language is at the core of Japaneseness, followed by exposure to Japanese media such as Japanese language newspapers, Japanese music, radio, movies and television. The third core consists of contacts with Japan, such as visiting and living in Japan. The fourth core centers around voluntary organizational membership, including religious organizations, friends and the like, followed by co-workers and other acquaintances. The more Japanese values one has, the more one acquires the core of Japanese values. Essentially the active use of Japanese language is the essence of the Japaneseness, followed by passive use as in the exposure to Japanese mass media.

In the previous surveys, we found that the younger the Japanese American, the less Japanese values possessed as measured by either generation or chronological age. Our task is to see if the 1988 survey yields any different results.

3.2 THE FINDINGS

First, sections of the findings will report on the "Japanesenes" scale results in terms of generation and age. Then we will identify sources of possible generational gaps between the first and second generations on the one hand and younger generations on the other.

GENERATION:

Figure 3-1 presents how the amount of the Japanese values Japanese Americans have varies by generation for all those who were included in the past three surveys conducted in 1972 through 1983. It is apparent by glancing the Figure that the older the generation, the more Japanese values it possesses. The further left on the horizontal axis a generation is found, the greater the amount of Japanese values held within that generation. Most of the Issei are found toward the left end of the continuum, while the Sansei are located toward the right end of the continuum.

Figures 3-2 through 3-5 are provided to show how consistently our findings have been. Figure 3-2 is from the initial survey of 1972, Figure 3-3 the 1978 survey, Figure 3-4 the 1983 survey, and then Figure 3-5 the latest survey of 1988. The number of respondents for each survey varies but proportionately speaking, there has been no significant change from 1972 to 1988.

Figure 3-6 shows combined data from all of the past surveys from 1972, 1978, 1983 and 1988. The majority of Issei are found toward the left end of the continuum, while the majority of Sansei are located toward the right end of the continuum, with the Nisei in the middle.

Thus, generation continues to act as an important variable affecting the extent of Japaneseness among Japanese Americans in Honolulu. This finding also suggests the highly reliable nature of our data, which yield the same results over the years.

Figure 3-7 is constructed to show the same trend differently by the year of survey and the generation. There are some zigzags over the years from 1972 to 1988 particularly the Issei, but the Nisei's line is almost as straight as that of the Sansei. It

Figure 3-5

Figure 3-6

Figure 3-7

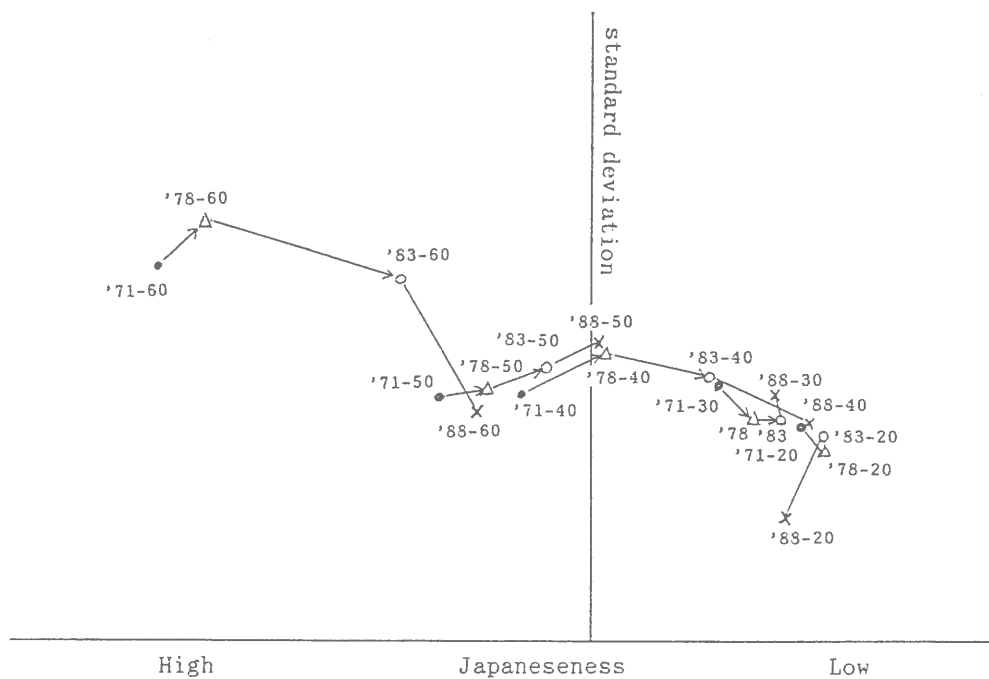

Figure 3-8

is interesting to note that when a Nisei or Sansei marries a Japanese national or an Issei, the children seemed to be affected by both. That is to say that one whose parents are mixed generations of the Issei and the Nisei, is likely to maintain more Japanese values than the Sansei whose parents are both Nisei as shown in Figure 3-7.

The Yonsei, as expected, possess the least Japanese values but they are not totally lost. The trend is toward the acquisition of more Japanese values from 1972 to 1988.

Now let us look at age as the independent variable affecting the extent of Japaneseness among Japanese Americans.

AGE: Age is, of course, closely related to generation. One would expect from the previous findings that the younger the respondent the less Japaneseness she or he possesses. Entries in Figure 3.8 bear out our expectation.

The horizontal axis in Figure 3.8 represents the Japanese scale scores. The vertical axis depicts standard deviation scores. Those who are 60 and over naturally have more Japanese values than their younger counterparts as they are found in the left side of the configuration.

There are two observations we can make on the oldest age group. First, the variance among them declines somewhat over the years, particularly since 1978. Second, they are fast becoming less Japanese-oriented more than any other group.

The second oldest group, those in their 50's, have lost some Japanese values but only about half as much as those in the oldest age group, while their standard deviation scores are somewhat rising.

Middle-aged Japanese Americans in their 40's in the late 1980's have lost much of their Japanese values when compared with their compatriots in the early 1970's. This middle-aged group in 1988 possessed about as much Japanese values as the oldest age group respondents of 1988. Today, there are no significant differences between those who are in 40's 30's and 20's.

Those in the 30's have not changed much over the years. They did not have much Japanese values back in 1972 and still do not in 1988 but no less so compared to their counterparts in 1972. In fact, they stopped losing Japanese values in the 1980's.

Those in their 20's have not changed much in the two decades although they possess somewhat fewer Japanese values than did their counterparts in 1972. In fact, they have gained a few more Japanese values in 1988 when compared with the 1983 data.

Those under 20 are continuing to lose what little Japanese values they had.

There are two general trends to be noted here. With the exception of those in their 50's, the standard deviation scores are declining, suggesting that each age group is becoming more homogenized with respect to the amount of Japanese values they retain. Second, older age groups consisting those over 40 are continuing to lose their Japanese values when compared to earlier data over the years. Those under 30's did not have much Japanese values, but they are not losing much any longer.

3.3 CONTEMPORARY GENERATIONAL GAP

"Generation gap" is a common phenomenon observed in many societies that existed for centuries, for a society cannot hope to make any progress without creating tensions and disagreements between generations. In other words, the existence of a generational gap is not only healthy but also is a necessary condition for any society to move forward. However, it is equally true that generational gaps can be painful and unpleasant experiences for those who are involved in generational tensions and conflicts. How do Japanese Americans fare in this regard? In earlier years, the Issei thought their Nisei children were turning into ducks when they thought they were raising chickens.

For the purpose of analysis, all Japanese Americans are divided into two groups, *i.e.*, 1) older generation consisting of Issei, Nisei and Kibei who were educated in Japan and 2) younger generations who are composed of the rest of younger

generations. Then this recorded variable was run against all items in the Questionnaire.

First of all, it should be made clear that younger generations are less exposed to Japan and its culture than older generations, as manifested in the number of times they visited Japan. The following are responses given to the ensuing question:

Q 88:

Have you ever visited Japan?

- 1) No (OG 24%, YG 51%)
- 2) Yes, once (OG 23%, YG 26%)
- 3) Yes, 2-5 times (OG 34%, YG 14%)
- 4) Yes, 6-10 times (OG 8%, YG 4%)
- 5) Yes, 11 or more times (OG 6%, YG 3%)

It is clear that older generation respondents have visited Japan many more times than younger ones. Only one quarter of older generation Japanese Americans have yet to visit Japan as opposed to 51 percent who have never visited Japan. It is significant to note that a significant minority of younger Japanese Americans (21%) have visited Japan more than once, although the comparable figure for older respondents is nearly 50 percent. In short, a great majority of Japanese Americans have visited Japan and are exposed to Japanese culture in Japan. Keeping this demographic background in mind we now will look at their attitudinal differences. ²

Q 09-B:

From the answers on this card B, to what extent do you worry, either for yourself or for your family, about each of the following: b. "Car accident"

- 1) Very much (OG 52%, YG 28%)
- 2) Somewhat (OG 28%, YG 37%)
- 3) Slightly (OG 14%, YG 28%)
- 4) Not at all (OG 5%, YG 6%)

² What is reported here includes only those instances where differences of more than 20 percent were found between the two generational groups.

What is interesting about this item is that ones who are more likely to get involved in car accidents, particularly those who are under 25 years of age are much less concerned with car accidents than older generation respondents. A majority (52%) of older generation respondents worry about car accidents "very much" as opposed to only 28 percent of their younger compatriots.

Other items asked in this series of the questions were serious sickness, street crime, unemployment, war and a nuclear power accident. On all items, the older generation showed more concern, but responses to car accidents showed the widest gap between the two generations.

Q 15:

Compared with others of your age, do you think that your health is³:

- 1) Very satisfied (OG 34%, YG 64%)
- 2) Satisfied (OG 59%, YG 31%)
- 3) Dissatisfied (OG 6%, YG 4%)
- 4) Very dissatisfied (OG 0%, YG 0%)

It is very interesting that in spite of the fact that the question asked specifies with whom the respondents should compare in answering the question, almost twice as many members of the younger generation claimed to be "very satisfied" with their health in relation to the older generation respondents. Perhaps what it means is that younger respondents are more confident of their own good health. Put another way, older generation respondents know better in assessing the status of their health with others of similar age. In either case, the fact is that the difference exists.

Q 18:

If you were to get enough money to live as comfortably as you would like for the rest of your life, would you continue to work or would you stop working?

- 1) Continue to work (OG 33%, YG 64%)
-

³ Although this is how the question was asked, it should have read something like "how do you feel about your health?"

2) Stop working (OG 59%, YG 31%)

The difference between the two generations on this question is striking. A good majority of older respondents (59%) would stop working if they were to get enough money while only one-third of the younger respondents would do so. A further examination of data outputs revealed that this difference is the function of age. The following figures are those who would continue to work for each age group:

Under 24:	89%
25-34:	75%
35-44:	67%
45-54:	61%
55-64:	37%
65-74:	30%
75 & over:	28%

It would require cohort analysis to determine which of the three reasons is responsible for this difference, viz., aging, historical period, or cohort effects. Whatever the reason, it is clear that it relates to age difference and not generation as such. ⁴

Q 28:

All things considered, how satisfied are you with your family life - the time you spend and the things you do with members of your family? Please indicate your feelings on the five point scale shown in your answer card.

- 1) Very satisfied (OG 56%, YG 35%)
- 2) Satisfied (OG 38%, YG 56%)
- 3) Neither satisfied nor dissatisfied (OG

⁴ In order to find out if this is peculiar to Japanese Americans or true of other ethnic groups as well, we examined how non-Japanese Americans responded to this question by age. We found that a similar trend exists, except the difference was not as acute as the difference found among the Japanese Americans. The difference ranged from 79 percent for the youngest age group to 26 percent for the oldest age group for other ethnic groups.

- 4%, YG 7%)
 4) Dissatisfied (OG 0%, YG 1%)
 5) Very dissatisfied (OG 0%, YG 0%)

First of all, it is remarkable that nearly every Japanese American is either very satisfied, satisfied or at least not dissatisfied with their family life. Second, however older generation respondents are much more "very satisfied" than the younger generation with a majority consisting of 56 percent choosing this answer. One-third of the younger generation did so. It implies that younger respondents continued to look for more satisfaction in family life while their older members of the family were more content with the present family situation. It should be noted that when this item is run against age groups, we found the relationship mixed. In other words, this is a genuine generational an gap and not age gap. Our data for other ethnic groups indicate that age is not significant factor affecting their response to this question, also.

Q 37:

Do you agree with the following statement: "Home is the only place where one feels good and can relax."

- 1) Agree (OG 69%, YG 34%)
 2) Disagree (OG 30%, YG 65%)
 3) Undecided (OG 1%, YG 1%)

This difference is startling because of the size of gap between the two generations. A check on age difference reveals that over 60 percent of those who are 55 and older Japanese Americans agree with the statement. This is true of other ethnics but not as much so as Japanese Americans. Their figure for ages 55 and over is about 50 percent. Apparently younger Japanese Americans in particular find a place of relaxation elsewhere outside the home, while the great majority of the older generation finds it at home.

Related to this item is the question of marriage which is discussed next.

Q 38:

Among the following opinions, which one comes closes to your own opinion?

- 1) Marriage is permanent (OG 58%, YG 35%)
- 2) Marriage may be broken under serious circumstances (OG 34%, YG 42%)
- 3) Marriage can be broken by simple agreement of the two partners (OG 6%, YG 21%)

Although the difference is not as striking as the previous family-related item, a good majority of the older generation considers marriage to be permanent, but only one-third of the younger generation does so. There is no significant difference in opinion for the second concept of marriage and divorce between the two generations. But only a few older generation respondents perceive of marriage as something that can be broken easily, whereas one-fifth of the younger generation does.

Q 87:

How often do you watch Japanese television programs?

- 1) Never (OG 11%, YG 23%)
- 2) Occasionally (OG 38%, YG 52%)
- 3) Regularly/Often (OG 50%, YG 18%)

Younger respondents are somewhat less likely to watch any television programs. ^s However, the difference was slight for television viewing in general. For Japanese programs, the difference is much greater. Exactly one half of the older generation watches Japanese television programs regularly or often as opposed to only less than one-fifths of the younger generation. Perhaps the younger generation finds a wider range of activities which give them more meaning in life than staying home to watch Japanese television programs in the evenings and weekends.

On the whole the generation gap we found centers around family life and not in political, social or religious issues. What this suggests is that the difference we found

^s Q 86 dealt with the question of whether or not one watches television in general. Younger respondents were found to spend slightly less time for television viewing.

in this section is most likely caused by the aging process and not by cohort or periodic effects since the major gap is found with respect to the family arena only and not in other social issues. A further data analysis using cohort analysis of the accumulated longitudinal data is needed to answer just what is causing the generation gap.

3.3 THE REFERENCES

The Research Committee on the Study of Honolulu Residents, The Third Attitudinal Survey of Honolulu Residents, 1983. Tokyo: The Institute of Statistical Mathematics, 1986.

CHAPTER 4

CONCLUDING REMARKS

The 1988 survey was an integral part of a longitudinal and comparative study of cultures initiated in 1953 and includes not only Hawaii but also Japan, the mainland United States and several countries in Europe. We are essentially interested in uncovering an internally consistent way of organizing life experience in a culture. The present survey represents the fourth survey by the same team of scholars since 1971.

A systematic random sample of 499 registered voters who reside in Kokohead in the east through Diamond Head side of Middle Street in the west in Honolulu, Hawaii were interviewed from the summer of 1988 through the early part of the 1989.

The present report contains the initial phase of the data analysis. Further data analyses are needed to uncover "implicit" dimensions of Honolulu's culture. Most items included in the 1988 survey were items asked in the past surveys. **The results of the 1988 survey show little change from those of the last survey conducted in 1983, except with items dealing with the environment, war, unemployment and child adoption.**

The sharp increases in concerns for nature and environment are indicative of increasing concern expressed by many authorities and action-oriented groups over the deteriorating nature of our environment in the past two decades. It is significant that we now find more people in Honolulu who believe that we should follow nature than those who believe we should use nature. This is a remarkable transformation -- a victory for our environment.

Our findings on unemployment and war also fit with the changes we noted as the rate of unemployment dipped below three percent starting in 1988 and as the cold war is fast coming an end. Unemployment is not a problem in Honolulu but finding a job that pays a decent wage and that give a feeling of accomplishment is.

In this report, only a few items of importance are covered. There is a clear need for further data analyses and a book-length report on the longitudinal data accumulated over the years.

APPENDIX 1

QUESTIONNAIRE AND FREQUENCY DISTRIBUTION

APPENDIX 2

FREQUENCY DISTRIBUTION BY DEMOGRAPHIC CATEGORIES

APPENDIX 1

QUESTIONNAIRE AND FREQUENCY DISTRIBUTION

The percentage for the total group [N = 499] appears first, followed by the percentage for non-Japanese Americans [N = 319] and followed by Japanese Americans last [N = 180].

QUESTIONNAIRE

for

A STUDY OF HONOLULU RESIDENTS

I am _____, and I have come to interview you for the University of Hawaii and the Institute of Statistical Mathematics (Tokyo). They are conducting a survey to find out about different ways of thinking among people of different backgrounds.

You have been randomly selected from a list of registered voters in Honolulu to be interviewed for the survey, which is being carried out for academic purposes only. Individual responses will be kept completely confidential. Please note, there are no right or wrong answers to many of the questions asked in the Questionnaire.

Your participation is vital to the success of the study because, to keep our sample as scientific as possible, we cannot substitute other people for those who do not reply. It will take less than half an hour to complete.

If you are interested in the results of the study, a summary report will be sent to you in 1989.

Note to Interviewers

If you have any trouble, have the respondent contact anyone of the following persons at any time of the day:

Dr. Y. Kuroda at 948-8494, 948-8357 (message), 373-3268 (residence)
Mrs. Alice Kuroda, 377-5913 (office)

Institute of Statistical Mathematics
Tokyo, Japan

University of Hawaii at Manoa
Department of Political Science

Sample No. _____ Respondent's Name _____

Interviewed by _____ Time from _____ to _____ Date _____ 1988

Number of Times Contacted: First Time: time and day _____
Second Time: time and day _____
Third Time: time and day _____

01 Compared with ten years ago, do you think the standard of living of Americans as a whole is:

25/23/30	1) Much better	3/ 4/ 2	5) Much worse
42/40/44	2) Slightly better	1/ 2/ 1	6) Other _____
12/13/10	3) Same	2/ 3/ 1	7) DK
14/15/12	4) Slightly worse		

02 Compared with ten years ago, do you think your standard of living is:

40/39/43	1) Much better	1/ 2/ 0	5) Much worse
30/28/34	2) Slightly better	1/ 1/ 1	6) Other _____
20/22/18	3) Same	1/ 1/ 0	7) DK
7/ 8/ 4	4) Slightly worse		

03 Do you think that your living conditions will get better or get worse over the next five years?

19/19/18	1) Much better	2/ 2/ 1	5) Much worse
33/32/35	2) Slightly better	2/ 3/ 2	6) Other _____
32/31/34	3) Same	2/ 3/ 1	7) DK
10/10/ 8	4) Slightly worse		

04 Do you think people will become more happy, or more unhappy?

28/27/29	1) More happy	5/ 5/ 5	4) Other _____
28/29/27	2) More unhappy	6/ 7/ 4	5) DK
33/32/35	3) No change		

05 What do you think about people's peace of mind? Will it increase or decrease?

31/28/38	1) Increase	3/ 4/ 3	4) Other _____
33/34/33	2) Decrease	5/ 6/ 3	5) DK
27/29/23	3) Not change		

07 Do you think that people's health will improve in the future, or do you think it will get worse?

73/73/72	1) Improve	2/ 2/ 2	4) Other _____
15/15/15	2) Get worse	2/ 2/ 1	5) DK
9/ 9/10	3) Not change		

08 There is a lot of talk these days about what the country's goals should be for the next ten or fifteen years. On this card A are listed some of the goals that different people say should be given top priority. Would you please say which one of them you yourself consider most important in the long run. [SHOW CARD A]

35/33/38	1) Maintaining order in the nation		
27/25/31	2) Giving the people more say in important governmental decisions		
20/19/22	3) Fighting rising prices		
12/16/ 6	4) Protecting freedom of speech		
3/ 4/ 2	5) Other _____		
2/ 3/ 2	6) DK		

09 From the answers on this card B, to what extent do you worry, either for yourself or for your family, about each of the following? [B]

	1) Very much	2) Somewhat	3) Slightly	4) Not at all	5) Other	6) DK
a Serious sickness	31/27/38	32/32/33	24/27/18	12/13/11	0/ 0/ 1	0/ 0/ 1
- Street crime (mugging)	41/38/45	32/30/34	20/24/13	7/ 7/ 7	1/ 0/ 1	0/ 1/ 0
b Car accident	35/32/39	33/33/33	24/25/21	7/ 8/ 6	1/ 0/ 1	1/ 1/ 0
c Unemployment	15/15/15	27/26/30	25/23/28	30/33/24	1/ 1/ 2	1/ 1/ 1
d War	27/24/33	26/26/28	26/25/28	18/23/ 9	1/ 1/ 1	1/ 1/ 2
e Nuclear power accident	34/32/38	21/18/27	21/22/21	21/26/12	1/ 0/ 2	1/ 2/ 1

11 Would you say you are on the whole more or less inclined than the average to honor your ancestors?

48/45/52 1) More than the average 2/ 3/ 1 4) Other _____
 18/20/14 2) Less than the average 2/ 3/ 2 5) DK
 30/29/32 3) Average

12 If you had no children, would you think it desirable to adopt a child in order to continue the family line, even if there is no blood relationship? Or do you not think this is important?

40/45/33 1) Would adopt 5/ 6/ 4 4) Other _____
 39/35/44 2) Would not adopt 3/ 1/ 5 5) DK
 13/13/13 3) Depends on...

15 Compared with others of your age, do you think that your health is:

41/42/38 1) Very satisfied 1/ 1/ 0 4) Very dissatisfied
 51/47/57 2) Satisfied 0/ 1/ 0 5) Other _____
 7/ 9/ 5 3) Dissatisfied 0/ 0/ 0 6) DK

16 From the answers on this card, how would you classify your standard of living? [C]

3/ 4/ 2 1) Upper 1/ 1/ 1 5) Lower
 28/31/22 2) Upper middle 0/ 1/ 0 6) Other _____
 58/54/67 3) Middle 0/ 0/ 1 7) DK
 9/ 9/ 9 4) Lower middle

17 If you had to choose between more money and free time, which would you choose?

46/44/49 1) More money 4/ 4/ 5 3) Other _____
 48/51/44 2) More free time 2/ 2/ 2 4) DK

18 If you were to get enough money to live as comfortably as you would like for the rest of your life, would you continue to work or would you stop working?

57/61/49 1) Continue to work 7/ 8/ 5 3) Other _____
 35/30/44 2) Stop working 1/ 0/ 1 4) DK

19 Which one of these opinions comes closest to your own? [D]

- 62/62/61 1) No matter how much money you have life without work is wasted
32/31/34 2) As long as you have money life isn't wasted even if you don't have a job
5/ 5/ 3 3) Other _____ 2/ 2/ 1 4) DK

20 Here are some of the things people usually take into account in relation to their work. Which one would you personally place first?[E]

- 14/13/14 1) A good salary so that you do not have any worries about money
13/11/17 2) A safe job with no risk of closing down or unemployment
16/13/22 3) Working with people you like
55/60/46 4) Doing an important job which gives you a feeling of accomplishment
2/ 3/ 2 5) Other _____ 0/ 0/ 0 6) DK

22 There are all sorts of attitudes toward life. Which one of the following statements would you say comes closest to your way of life? [F]

- 10/10/ 9 1) Work hard and get rich
5/ 6/ 4 2) Study earnestly and make a name for yourself
33/35/29 3) Don't think about money or fame; just live a life that suits your own taste
36/32/43 4) Live each day as it comes, cheerfully and without worrying
9/ 8/11 5) Resist all evils in the world and live a pure and just life
2/ 3/ 2 6) Never think of yourself, give everything in service of society
4/ 6/ 1 7) Other _____ 0/ 0/ 1 8) DK

23 How do you feel about the quality of life in the area where you live? [G]

- 35/33/39 1) Very satisfied 1/ 1/ 1 4) Very dissatisfied
57/58/55 2) Satisfied 0/ 0/ 1 5) Other _____
6/ 8/ 4 3) Dissatisfied 0/ 0/ 1 6) DK

25 There is a story of an idle grasshopper and diligent ant in one of Aesop's fables. When winter came, the grasshopper who spent the summer singing came for help to the ant who worked all through the summer. The ant could have given either of the following two replies. Which one of the two do you think suits you best as the conclusion of the story? [H]

- 7/ 6/ 9 1) The ant sends the grasshopper away because it is only natural that the grasshopper should suffer now
91/91/91 2) The ant first admonishes the grasshopper, saying, "You are to blame for having been idle you should work harder from now on" and then shares his food
1/ 2/ 0 3) Other: _____ 1/ 1/ 0 4) DK

26 What is the single most important thing in life for you? Please tell me one -A thing only: WRITE IN.

26 What other things are very important to you? You can mention as many things
-B as you like.

27 Using this scale can you tell me how important each of the following is to you? [I]

	Not imprnt at all	1	2	3	4	5	6	7	8	DK
a Your immediate family and children if you have any	:	:	:	:	:	:	:	:	:	:

3/ 3/ 3 3) Undecided

34 Some people say that if we get outstanding political leaders, the best way to improve the country is for the people to leave everything to them, rather than for the people to discuss things among themselves. Do you agree with this, or disagree?

9/ 9/10 1) Agree 0/ 0/ 0 4) Other _____
81/82/77 2) Disagree 0/ 0/ 1 5) DK
9/ 8/12 3) It depends on the situation

35 If you think a thing is right, do you think you should go ahead and do it even if it is contrary to usual custom, or do you think you are less apt to make a mistake if you follow custom?

57/60/51 1) Go ahead 2/ 3/ 1 4) Other _____
17/13/22 2) Follow custom 1/ 1/ 1 5) DK
24/23/25 3) Depends on...

36 Some people say that however mechanized the world gets, nothing can reduce the richness of human feelings. Do you agree with this opinion, or do you disagree?

78/77/81 1) Agree 1/ 0/ 1 4) Other _____
14/16/12 2) Disagree 2/ 3/ 1 5) DK
5/ 4/ 6 3) Undecided

37 Do you agree with the following statement: "Home is the only place where one feels good and can relax."?

44/41/51 1) Yes 1/ 2/ 1 3) Other _____
54/58/48 2) No 0/ 0/ 0 4) DK

38 Among the following opinions, which one comes closest to your own opinion?
[K]

43/42/46 1) Marriage is permanent
37/37/38 2) Marriage may be broken under serious circumstances
17/18/14 3) Marriage can be broken by simple agreement of the two partners
2/ 2/ 2 4) Other _____ 1/ 1/ 1 5) DK

39 What do you think about housework and child care? [L]

5/ 4/ 7 1) That's women's work
32/29/36 2) Some of the work is more suited for women
60/63/54 3) All of the work should be divided without differentiation between men and women
3/ 3/ 3 4) Other _____ 0/ 1/ 0 5) DK

40 Suppose that a child comes home and says that he has heard a rumor that his teacher had done something to get himself into trouble, and suppose that the parent knows this is true. Do you think it is better for the parent to tell the child that it is true, or to deny it?

77/76/79 1) Tell the truth 13/15/11 3) Other _____
7/ 6/ 8 2) Deny it 2/ 3/ 2 4) DK

41 Imagine this situation. Mr. A was orphaned at an early age and was brought up by Mr. B, a kind neighbor. Mr. B gave him a good education, sent him to a university, and now Mr. A has become the president of a company. One day he gets a telegram saying that Mr. B, who brought him up, is seriously ill and asking if he would come at once. This telegram arrives as he is going to an important meeting which will decide whether his firm is to go bankrupt or to survive. Which of the following things do you think he should do? [M]

60/59/60 1) Leave everything and go back home
31/29/34 2) However worried he might be about Mr. B, he should go to the meeting
8/10/ 6 3) Other _____ 1/ 2/ 1 4) DK

42 The last question supposed that Mr. B had taken him in as an orphan in his youth and brought him up. Suppose that was his real father who was on his deathbed. Which would have been your answer then? [N]

65/65/64 1) Leave everything and go back home
25/24/27 2) However worried he might be about his father, he should go to the meeting
9/10/ 7 3) Other _____ 2/ 2/ 2 4) DK

43 Here are three opinions about man and nature. Which one of these do you think is closest to the truth? [O]

48/46/51 1) In order to be happy, man must follow nature
42/45/39 2) In order to be happy, man must use nature
4/ 3/ 7 3) In order to be happy, man must conquer nature
4/ 5/ 2 4) Other _____ 2/ 1/ 2 5) DK

44 Please choose from among the following statements the one with which you agree most. [P]

28/28/29 1) If individuals are made happy, then and only then will the country as a whole improve
29/26/33 2) If the country as a whole improves, then and only then can individuals be made happy
36/39/32 3) Improving the country and making individuals happy are the same thing
5/ 6/ 3 4) Other _____ 2/ 2/ 3 5) DK

45 If you were asked to choose two out of the following, which two would they be? [Q] DON'T FORGET TO GET TWO ANSWERS FOR THIS QUESTION

Selected

73/69/78 1) Love and respect for your parents
19/16/23 2) Repaying obligations to benefactors
76/78/72 3) Respecting rights of the individual
31/34/26 4) Respecting freedom of the individual
1/ 1/ 1 5) Other _____ 6) DK

46 Whom do you consider more desirable as a person? [R]

- 79/77/82 1) A person who is friendly and can be counted on to help others but is not an efficient worker
14/15/13 2) A person who is an efficient worker but is indifferent to the worries and affairs of others
6/ 6/ 6 3) Other _____ 1/ 2/ 0 4) DK

47 Which one of the following personality types would you like best? [S]

- 26/27/23 1) A person who stresses rational decisions according to a principle without regard to interpersonal harmony
68/66/72 2) A person who stresses the value of maintaining interpersonal harmony even if it may go against his own principle
5/ 6/ 3 3) Other _____ 1/ 1/ 2 4) DK

48 Suppose that you are the president of a company. The company decides to employ one person, and then carries out an employment examination. The supervisor in charge reports to you saying, "Your relative who took the examination got the second highest grade. But I believe that either your relative or the candidate who got the highest grade would be satisfactory. What shall we do?" In such a case, which person would you employ? [T]

- 68/67/68 1) One with the highest grade 5/ 5/ 3 3) Other _____
26/26/27 2) Your relative 2/ 2/ 2 4) DK

49 In the last question we supposed that the one getting the second highest grade was your relative. Suppose that the second was the son of someone to whom you felt indebted. Which person would you employ? [U]

- 59/62/52 1) One with the highest grade 4/ 4/ 4 3) Other _____
35/31/42 2) Son of your benefactor 2/ 3/ 2 4) DK

50 Suppose you are working in a firm in which there are two types of department chiefs. Which of these two would you prefer to work under? [V]

- 41/41/41 1) A: A man who always sticks to the work rules and never demands any unreasonable work, but who, on the other hand, never does anything for you personally in matters not connected with the work
58/57/59 2) B: A man who sometimes demands extra work in spite of rules against it, but who, on the other hand, looks after you personally in matters not connected with the work
1/ 2/ 0 3) Other _____ 0/ 1/ 0 4) DK

51 Would you say that most of the time people try to be helpful, or that they are mostly just looking out for themselves?

- 63/66/58 1) Try to be helpful 3/ 3/ 3 3) Other _____
33/30/38 2) Just to look out for themselves 1/ 1/ 1 4) DK

52 Do you think most people would try to take advantage of you if they got the chance, or would they try to be fair?

- 29/30/28 1) Would take advantage 4/ 4/ 3 3) Other _____
67/66/68 2) Would try to be fair 0/ 0/ 1 4) DK

53 Generally speaking, would you say that most people can be trusted or that you can't be too careful in dealing with people? _____

51/46/60 1) Can be trusted 2/ 3/ 1 3) Other _____
 46/50/39 2) Cannot be too careful 1/ 1/ 0 4) DK

54 I am going to read out some things that people have said about life today. As I mention each one would you tell me from the answers on this card how much you agree or disagree. [W]

	Agree	Disagree	DK
a Most people will go out of their way to help someone else	12/12/12	70/71/67	16/15/18
b I feel I am part of a close-knit local community	14/15/13	53/52/54	27/28/26
c Nowadays a person has to live pretty much for today and let tomorrow take care of itself	14/13/16	34/34/34	33/32/34
d The way you earn money is more important than how much you earn	44/47/40	37/35/40	11/12/10

55 To what extent do you think that science and its applications bring improvements in your everyday life?

72/72/72 1) A lot 1/ 1/ 2 4) Other _____
 26/25/26 2) A little bit 1/ 1/ 1 5) DK
 0/ 1/ 0 3) Not at all

56 In the future, computers will change our lives. How do you feel about this development? [X]

45/50/37 1) A desirable thing 5/ 5/ 6 3) A regrettable and dangerous thing
 48/44/56 2) An understandable, but inevitable thing 1/ 1/ 1 4) Other _____
 1/ 2/ 1 5) DK

59 One hears a lot about energy conservation today. Do you feel that saving energy is:

67/67/67 1) Very important 0/ 0/ 1 4) Not important at all
 30/30/29 2) Important 0/ 0/ 1 5) Other _____
 2/ 2/ 2 3) Not very important 0/ 0/ 1 6) DK

60 How important is environmental preservation to you?

73/74/70 1) Very Important 0/ 0/ 0 4) Not important at all
 25/24/28 2) Important 0/ 1/ 0 5) Other _____
 1/ 0/ 1 3) Not very important 1/ 1/ 1 6) DK

61 What comes first to your mind when you think of American culture? [IF ONLY ONE ITEM IS MENTIONED, ASK: Is there anything else you can think of?]

- 1) _____
- 2) _____

62 I'd like to ask you a question about religion next. Do you, for example,
-A have any personal religious faith?

74/76/71 1) Yes 2/ 3/ 1 3) Other _____
23/21/28 2) No 0/ 0/ 0 4) DK

62 (If yes), what religion is that?

-B

11/ 2/28 1) Buddhism 14/15/11 5) Other _____
26/27/25 2) Protestant 0/ 1/ 0 6) None
22/31/ 8 3) Catholic 0/ 0/ 0 7) DK
2/ 3/ 0 4) Jewish

63 Without reference to any of the established religions, do you think that a
religious attitude is important or not?

80/80/80 1) Important 6/ 7/ 6 3) Other _____
13/13/13 2) Not important 1/ 1/ 1 4) DK

64 There are some people who say about religion that there are many sects all
with their own different positions, but that really their teachings all
amount to the same thing. Would you agree with this or not?

68/65/75 1) Yes 4/ 6/ 1 3) Other _____
26/28/23 2) No 2/ 2/ 1 4) DK

66 How interested are you in politics?

20/24/12 1) Very much 5/ 4/ 6 4) None
50/47/54 2) Somewhat 1/ 1/ 1 5) Other _____
25/24/27 3) Little 0/ 0/ 0 6) DK

67 What do you think about "Democracy," "Capitalism," "Socialism," "Liberalism"
and "Conservatism," ? Are you favorably or unfavorably disposed to these
ideas? [Y]

	1-Favorable	2-Depends on	3-Unfavorable	4-Other	5-DK
a Democracy	87/88/85	12/11/13	0/ 0/ 1	0/ 0/ 0	1/ 1/ 1
b Capitalism	51/53/47	35/37/33	10/ 7/15	0/ 0/ 0	4/ 3/ 5
c Socialism	15/17/12	47/45/49	32/32/32	0/ 1/ 0	6/ 5/ 7
d Liberalism	19/20/17	47/45/52	22/22/21	2/ 2/ 1	10/10/ 9
e Conservatism	21/23/17	58/55/62	13/13/14	1/ 1/ 1	7/ 8/ 6

69 With what you know of our legal system, how do you feel it is working in
our country today?

7/ 9/ 4 1) Very well 8/ 9/ 7 4) Very poorly
56/50/64 2) Fairly well 3/ 3/ 3 5) Other _____
25/28/20 3) Poorly 1/ 1/ 1 6) DK

71 Which one of the three following views toward one's society comes closest to yours? [Z]

- 1/ 2/ 1 1) The entire way our society is organized must be radically changed by revolutionary action
- 75/71/81 2) Our society must be gradually improved by reforms
- 20/22/15 3) Our present society must be valiantly defended against all subversive forces
- 2/ 3/ 0 4) Other _____ 2/ 2/ 3 5) DK

73 How often do you attend political rallies, campaign fund-raising events and the like?

- 5/ 7/ 2 1) Very often 34/36/32 4) Never
- 24/24/23 2) Sometimes 0/ 1/ 0 5) Other _____
- 36/33/43 3) Rarely 0/ 1/ 0 6) DK

75 Which political party do you support?

- 48/36/71 1) Democratic party 15/18/11 4) Independent
- 20/28/ 7 2) Republican party 2/ 3/ 1 5) DK
- 14/17/11 3) Other _____

77 In what year were you born?

* See below.

18: : : 19: : :

78 Sex (Don't ask this question. Just identify.)

- 48/49/47 1) Male 52/51/53 2) Female

79 Where were you born?

- 64/48/93 1) Hawaii: specify town or city and island _____
- 22/34/ 3 2) Elsewhere U.S.A.: specify state _____
- 13/18/ 4 3) Elsewhere outside U.S.A.: specify country _____
- 0/ 0/ 0 4) Other _____ 0/ 0/ 0 5) DK

80 If you were not born here, how many years have you been living in Hawaii?

		years living in Hawaii				
<u> </u> : <u> </u> : <u> </u> years	born here	64/48/93	1-10	7/11/ 0	30-39	3/ 4/ 2
			10-19	10/14/ 2	40-	6/ 7/ 3
			20-29	9/14/ 0	DK	1/ 2/ 1

81 What is your educational background?

- 3/ 4/ 1 1) Elementary school or less 39/40/37 5) University or college
- 6/ 5/ 8 2) Junior high school 19/22/14 6) Graduate work or professional school (e.g., law school)
- 21/20/23 3) Senior high school
- 11/ 8/17 4) Technical/Business school 1/ 1/ 1 7) DK

* 77 Age

18-19	1/ 1/ 2	35-39	10/13/ 7	55-59	7/ 6/11	75-79	4/ 4/ 4
20-24	4/ 4/ 3	40-44	11/11/10	60-64	11/10/13	80-	4/ 3/ 6
25-29	6/ 8/ 3	45-49	7/ 8/ 7	65-69	10/10/11		
30-34	8/ 8/ 8	50-54	6/ 6/ 6	70-74	9/ 9/ 9	DK	0/ 1/ 0

82 What is your regular occupation? _____
Please be specific. Specify the nature of job.

- 19/19/18 1) Professional: professor, physician, teacher, engineer, lawyer
- 9/ 9/ 9 2) Managerial: high gov't official, mgr/proprietor (large)
- 7/ 6/10 3) Skilled worker: carpenter, electrician, machinist
- 0/ 1/ 0 4) Farmer: agricultural worker
- 3/ 4/ 2 5) Semi-skilled or unskilled worker: bus driver, laborer
- 22/22/24 6) Clerical worker: clerk, insurance salesman, policeman
- 7/ 7/ 7 7) Service worker: waiter, barber, cab driver
- 25/25/26 8) Housewife/student/not gainfully employed/on welfare
- 6/ 7/ 5 9) Small businessman: small store owner/manager

83 Are you single, married, divorced, or widowed?

- 11/11/12 1) Single living with parents
- 7/ 8/ 5 2) Single living without anyone of the opposite sex
- 2/ 2/ 1 3) Single living with someone of the opposite sex
- 64/62/68 4) Married
- 6/ 6/ 8 5) Widowed
- 1/ 1/ 0 6) Married but separated
- 8/ 9/ 6 7) Divorced
- 1/ 1/ 0 8) Other _____
- 0/ 0/ 0 9) DK

84 What ethnic group do you identify with?

- 7/11/ 0 1) Caucasian (island-born) 1/ 2/ 0 7) Korean
- 19/30/ 0 2) Caucasian (mainland-born) 2/ 3/ 0 8) Portuguese
- 2/ 3/ 1 3) Caucasian (foreign-born) 1/ 1/ 0 9) Puerto Rican
- 12/18/ 0 4) Chinese 6/ 7/ 4 10) Mixed: specify _____
- 5/ 8/ 0 5) Hawaiian 3/ 4/ 0 11) Other _____
- 34/ 0/96 6) Japanese 1/ 1/ 0 12) DK
- 7/12/ 0 13) Filipino

85 How often do you read newspapers?

- 0/ 0/ 0 1) Never 1/ 1/ 1 4) Other _____
- 13/16/ 8 2) Occasionally 0/ 0/ 1 5) DK
- 86/83/91 3) Regularly/Often

86 How often do you watch television?

- 31/26/39 1) Very often 1/ 1/ 1 4) Never
- 42/45/37 2) Often 2/ 3/ 1 5) Other _____
- 24/25/23 3) Not very often 0/ 0/ 0 6) DK

87 How often do you watch Japanese television programs?

- 40/52/17 1) Never 5/ 6/ 4 4) Other _____
- 39/35/46 2) Occasionally 0/ 0/ 0 5) DK
- 17/ 7/33 3) Regularly/Often

88 Have you ever visited Japan?

52/60/38	1) No	3/ 3/ 4	5) Yes, 11 or more times
21/18/24	2) Yes, once	3/ 2/ 4	6) Other _____
17/14/23	3) Yes, 2-5 times	0/ 0/ 0	7) DK
4/ 3/ 6	4) Yes, 6-10 times		

THANK YOU VERY MUCH FOR YOUR COOPERATION. MAY I HAVE YOUR TELEPHONE NUMBER SO THAT THE DIRECTOR COULD CALL TO THANK YOU PERSONALLY FOR YOUR KIND COOPERATION AND TO VERIFY THIS INTERVIEW?

Tele #: _____

Interviewer Remarks

A. In general, what was the respondent's attitude toward the interviewer?

67/66/69	1) Friendly and interested		
13/13/13	2) Cooperative but not particularly interested		
2/ 3/ 1	3) Impatient and restless		
0/ 0/ 0	4) Hostile	DK	17/17/18

B. Was respondent's understanding of the questions in general:

68/70/66	1) Good	1/ 1/ 2	4) Other _____
12/11/13	2) Fair	18/18/18	5) DK
1/ 0/ 1	3) Poor		

TO INTERVIEWERS: IF A RESPONDENT IS A JAPANESE-AMERICAN, THE FOLLOWING ADDITIONAL QUESTIONS SHOULD BE ASKED:

ID # _____ Interviewed by: _____

J01 How often do you read Japanese language newspapers?

- | | |
|----------------------|------------------|
| 84 1) Never | 1 4) Other _____ |
| 9 2) Occasionally | 1 5) DK |
| 5 3) Regularly/Often | |

J02 How often do you listen to Japanese radio broadcasts?

- | | |
|----------------------|------------------|
| 56 1) Never | 3 4) Other _____ |
| 31 2) Occasionally | 2 5) DK |
| 9 3) Often/Regularly | |

J04 Do you like Japanese music?

- | | |
|--|--|
| 4 1) I like only Japanese music | |
| 74 2) I like Japanese and non-Japanese music | |
| 6 3) I like only non-Japanese music | |
| 11 4) I do not like Japanese music | |
| 2 5) I do not like any music | |
| 3 6) Other _____ | |
| 1 7) DK | |

J05 What does your family call you?

- | | |
|------------------------|------------------|
| 19 1) by Japanese name | 2 4) Other _____ |
| 64 2) by American name | 1 5) DK |
| 13 3) Both | |

J06 Which prefecture did your parents or grandparents come from?

- | | |
|----------------------------|---------------------------------|
| 19 1) Yamaguchi | 8 6) Other part of Honshu _____ |
| 6 2) Fukuoka | 0 7) Hokkaido |
| 11 3) Other part of Kyushu | 11 8) Elsewhere _____ |
| 14 4) Okinawa | 7 9) DK |
| 24 5) Hiroshima | |

J07 What generation are you?

- | | |
|--------------|---------------------------------|
| 2 1) Issei | 4 6) Parents: issei and nisei |
| 46 2) Nisei | 2 7) Parents: nisei and sansei |
| 40 3) Sansei | 0 8) Parents: sansei and yonsei |
| 4 4) Yonsei | 0 9) Kibei |
| 0 5) Gosei | 2 10) DK |

J08 How many years of Japanese language school did you have either in Japan or here?

16 1) None	35 5) 6-10 years
2 2) Less than a year	15 6) 10 years or more
12 3) 1-2 years	2 7) DK
19 4) 3-5 years	

J09 How well do you use Japanese?

14 1) Fluently	21 4) Very poorly
32 2) Passably	7 5) Not at all
26 3) I can understand it, but I cannot speak it	1 6) Other _____
	1 7) DK

J10 Do you have anyone in your immediate family, such as brother or sister, son or daughter, who is married to a non-Japanese?

47 1) No	3 4) Yes, 4 or more
27 2) Yes, one	3 5) Other _____
19 3) Yes, two-three	1 6) DK

J11 Have you ever lived in Japan for any length of time?

17 1) Yes	1 3) Other _____
79 2) No	2 4) DK

J12 Which one of the following response choices best describes your preference?

Foods	36 1) Japanese	23 2) American	33 3) Other	8 4) DK
Language	1 1) Japanese	88 2) English	8 3) Other	3 4) DK
Television	70 1) American	8 2) Japanese	18 3) Other	4 4) DK
Radio	8 1) Japanese	74 2) English	13 3) Other	5 4) DK
Spouse	62 1) Japanese	14 2) Non-Japanese	18 3) Other	6 4) DK
Close Friends	11 1) Non-Japanese	32 2) Japanese	51 3) Other	7 4) DK
Needs	79 1) Family needs	14 2) Individual needs	3 3) Other	4 4) DK

J13 Do you find it easier to write letters in English or in Japanese?

3 1) Japanese	0 4) Other _____
93 2) English	2 5) DK
2 3) Makes no difference	

J14 Do you have any occasion to write in Japanese to someone?

21 1) Yes	2 3) Other _____
76 2) No	2 4) DK

J15 Do you do your mental arithmetic in English or Japanese?

- 92 1) English
- 2 2) Japanese
- 4 3) Both or mixed up
- 0 4) Other _____
- 2 5) DK

J16 Which of the following statements best describes your closest friends?

[ANSWER CARD 1]

- 5 1) All of my closest friends are Japanese
- 30 2) Most of my closest friends are Japanese
- 60 3) Some of my closest friends are Japanese but I have some who are not Japanese
- 3 4) Most of my closest friends are not Japanese
- 1 5) None of my closest friends are Japanese
- 0 6) Other _____ 2 7) DK

J17 What kinds of organizations (e.g., church, service groups, neighborhood association) do you belong to? [ANSWER CARD 2]

- 13 1) Most of the organizations I belong to are almost exclusively Japanese
- 62 2) Most of the organizations I belong to are ethnically mixed groups
- 3 3) Most of the organizations I belong to are non-Japanese groups
- 18 4) Other _____ 4 5) DK

J18 If you are employed, which one of the following statements best describes your co-workers or colleagues at the place where you work? [ANSWER CARD 3]

- 3 1) All of my co-workers are Japanese
- 10 2) Most of my co-workers are Japanese
- 47 3) Some of my co-workers are Japanese but some are not
- 16 4) Most of my co-workers are not Japanese
- 3 5) None of my co-workers are Japanese
- 16 6) Other _____ 4 7) DK

THANK YOU VERY MUCH FOR YOUR COOPERATION!!!

ABBREVIATION

(NON-J OR J-A)

NJ : Non-Japanese Americans

JA : Japanese Americans

(GROUP)

HI : consisting of all those who were born in Hawaii but who did not identify themselves to be Japanese Americans

US : composed of Caucasian Americans who came from the U.S. mainland

OTH : composed of the rest such as immigrants from Asia and Europe

JA12 : Japanese Americans Issei and Nisei

JA3- : Japanese Americans Sansei

(SEX)

MALE : Male

FEMA : Female

(AGE)

-29 : 18-29

30- : 30-39

40- : 40-49

50- : 50-59

60- : 60 & over

DK : Don't know

(EDUCATION)

LOW : Q81 Code 1, 2, 3, and 4

HIGH : Q81 Code 5 and 6

DK : Don't know , Q81 code 7

(CLASS)

UPP : Q16 Code 1 and 2

MID : Q16 Code 3, 6, and 7

LOW : Q16 Code 4 and 5

01 Compared with ten years ago, do you think the standard of living of Americans as a whole is:

- 1) Much better
- 2) Slightly better
- 3) Same
- 4) Slightly worse
- 5) Much worse
- 6) Other _____
- 7) DK

08 There is a lot of talk these days about what the country's goals should be for the next ten or fifteen years. On this card A are listed some of the goals that different people say should be given top priority. Would you please say which one of them you yourself consider most important in the long run. [SHOW CARD A]

- 1) Maintaining order in the nation
- 2) Giving the people more say in important governmental decisions
- 3) Fighting rising prices
- 4) Protecting freedom of speech
- 5) Other _____
- 6) DK

HW88 Q25 #7.82

25 There is a story of an idle grasshopper and diligent ant in one of Aesop's fables. When winter came, the grasshopper who spent the summer singing came for help to the ant who worked all through the summer. The ant could have given either of the following two replies. Which one of the two do you think suits you best as the conclusion of the story? [H]

- 1) The ant sends the grasshopper away because it is only natural that the grasshopper should suffer now
- 2) The ant first admonishes the grasshopper, saying, "You are to blame for having been idle you should work harder from now on" and then shares his food
- 3) Other: _____
- 4) DK

HW88 Q28 #2.3C

28 All things considered, how satisfied are you with your family life -- the time you spend and the things you do with members of your family? Please indicate your feeling on the five point scale shown in your answer card.
[J]

- 1) Very satisfied
- 2) Satisfied
- 3) Neither satisfied nor
dissatisfied
- 4) Dissatisfied
- 5) Very dissatisfied
- 6) Other _____
- 7) DK

HW88 Q29 #2.82

29 Now I want to ask you about your life as a whole. How satisfied are you with your life as a whole these days? Which number on the five-point scale comes closest to how satisfied or dissatisfied you are with your life as a whole?
[J]

- 1) Very satisfied
- 2) Satisfied
- 3) Neither satisfied nor
dissatisfied
- 4) Dissatisfied
- 5) Very dissatisfied
- 6) Other _____
- 7) DK _____

HW88 Q34 #8.1B

34 Some people say that if we get outstanding political leaders, the best way to improve the country is for the people to leave everything to them, rather than for the people to discuss things among themselves. Do you agree with this, or disagree?

- 1) Agree
- 2) Disagree
- 3) It depends on the situation
- 4) Other _____
- 5) DK

HW88 Q41 #5.1

41 Imagine this situation. Mr. A was orphaned at an early age and was brought up by Mr. B, a kind neighbor. Mr. B gave him a good education, sent him to a university, and now Mr. A has become the president of a company. One day he gets a telegram saying that Mr. B, who brought him up, is seriously ill and asking if he would come at once. This telegram arrives as he is going to an important meeting which will decide whether his firm is to go bankrupt or to survive. Which of the following things do you think he should do? [M]

- 1) Leave everything and go back home
- 2) However worried he might be about Mr. B, he should go to the meeting
- 3) Other _____
- 4) DK _____

HW88 Q48 #5.1C1

48 Suppose that you are the president of a company. The company decides to employ one person, and then carries out an employment examination. The supervisor in charge reports to you saying, "Your relative who took the examination got the second highest grade. But I believe that either your relative or the candidate who got the highest grade would be satisfactory. What shall we do?" In such a case, which person would you employ? [T]

- 1) One with the highest grade
- 2) Your relative
- 3) Other _____
- 4) DK
